This is the twenty-seventh edition of the Annual Statistical Report. The purpose of the report is to provide consistent and accurate statistical and graphical information on some aspects of the activities of the University of Guelph. The emphasis in this year's edition, as in past editions, is on enrolment and enrolment-related data and trends.

The Annual Statistical Report consists of four sections:

Section 1.0 - Undergraduate Student Enrolment Data
Section 2.0 - Graduate Student Enrolment Data
Section 3.0 - Course and Faculty Counts
Section 4.0 - University Total Enrolment Statistics

All data, unless otherwise stated, are based upon the Ministry of Training, Colleges and Universities reporting dates: June 30, 2001 (spring term), November 1, 2001 (fall term) and February 1, 2002 (winter term).

Nancy Morrison, Analytical Assistant in the Office of Institutional Analysis and Planning, is the editor of the report.

Alex Harrington, Institutional Analysis and Planning, provided advice on managing and composition. Alex also provided the data extract service from the Colleague enrolment management system.

Karen Zago and Piuccia Hohenadel, Institutional Analysis and Planning assisted in the production.

Copies of the 2001/2002 Annual Statistical Report are available on request and on line through the University of Guelph homepage - under Services - Institutional Analysis and Planning - Reports.
