This is the twenty-ninth edition of the Annual Statistical Report. The purpose of the report is to provide consistent and accurate statistical and graphical information on some aspects of the activities of the University of Guelph. The emphasis in this year’s edition, as in past editions, is on enrolment and enrolment-related data and trends.

The Annual Statistical Report consists of four sections:

Section 1.0 - Undergraduate Student Enrolment Data  
Section 2.0 - Graduate Student Enrolment Data  
Section 3.0 - Course and Faculty Counts  
Section 4.0 - Collective Enrolment-Related Statistics  
Section 5.0 - Additional University Statistics

All data, unless otherwise stated, are based upon the Ministry of Training, Colleges and Universities reporting dates: June 30, 2003 (spring term), November 1, 2003 (fall term) and February 1, 2004 (winter term).

Copies of the 2003/2004 Annual Statistical Report are available on request and on line through the University of Guelph homepage - under Services - Resource Planning and Analysis - Reports.
