This is the thirty-first edition of the Annual Statistical Report. The purpose of the report is to provide consistent and accurate statistical and graphical information on some aspects of the activities of the University of Guelph. The emphasis in this year’s edition, as in past editions, is on enrolment and enrolment-related data and trends.

The Annual Statistical Report consists of five sections:

Section 1.0 - Undergraduate Student Enrolment Data
Section 2.0 - Graduate Student Enrolment Data
Section 3.0 - Course and Faculty Counts
Section 4.0 - Collective Enrolment-Related Statistics

All data, unless otherwise stated, are based upon the Ministry of Training, Colleges and Universities reporting dates: June 30, 2005 (summer term), November 1, 2005 (fall term) and February 1, 2006 (winter term).

Copies of the 2005/2006 Annual Statistical Report are available on request and on line through the University of Guelph homepage - Services - Resource Planning and Analysis - Reports.
