

GUFF presents:

'The Trees in our Life' series

Come out and enjoy the Guelph Urban Forest Friends special evenings for the 2011 International Year of the Forest.

Heritage Trees

Preserving our natural roots

By Edith George, Advisor to the Ontario Urban Forest Council and past Director of the Weston Historical Society.

What is a Heritage Tree? and Why is it important to protect them?

We learn how a tree can be designated as "heritage", using the toolkit produced by the Ontario Heritage Tree Alliance. Edith's main focus is on how we can identify a tree's historical and cultural significance. She uses one of her neighbourhood's special red oaks as the example tree in her presentation.

This free event is open to everyone – donations to support GUFF will be accepted

Date: Wednesday March 23rd

Time: 7:00 pm

Place: OAC Centennial Arboretum Centre, University of Guelph

Ontario Urban Forest Council representative Jack Radecki will be present to explain heritage designation procedures for our heritage trees.
