MSc Position investigating the community effect of managed cat intake into an animal shelter system

A 2-year MSc thesis position is available in the Department of Clinical Studies investigating the community effect of managed cat intake into an animal shelter system. The position is with Dr. Shane Bateman, Department of Clinical Studies and will commence September 1, 2017.

The project aims to investigate the effect within the community when managed intake of cats to match the number of cats in shelter with the available resources. This is a key element of a shelter strategy called capacity for care. The outcome and impact on the community for cats diverted in this strategy has not been studied. The successful candidate will be responsible for assisting in grant writing for project funding, review of existing literature, input into elements of experimental design, data collection and analysis and submission of findings for peer-reviewed publication. There will be elements of both qualitative and quantitative data analysis. The candidate will also complete coursework that provides further education and skills development in research methods and topics pertinent to the study subject matter.

Applicants are encouraged to send CV, transcripts, names and contact information of three references, and a cover letter stating interest in the abovementioned title to Dr. Shane Bateman, Associate Professor, Department of Clinical Studies, Ontario Veterinary College, University of Guelph, at sbateman@uoguelph.ca

Selection of the successful candidate is based on a combination of academic criteria, relevant interest and experience, referees' evaluations, and an assessment of the candidate's career goals and motivation. Review of applications will begin immediately, and continue until the position is filled. Funding for graduate stipend funding is available.

Research-related inquiries should be directed to Dr. Shane Bateman at sbateman@uoguelph.ca
