

MSc COURSE-WORK POSITION AVAILABLE

Department of Human Health and Nutritional Sciences

Students will work as part of a new laboratory within the department focussing on research related to **spine biomechanics and anatomy**.

Requirements:

- minimum 75% average during the final 2 years or 4 semesters of undergraduate work.
- Interest in biomechanics and anatomy of the lumbar spine and spine muscles, related specifically to spine and muscle function, injury, adaptation and rehabilitation.

Position is available to start in September 2010 or January 2011.

Interested candidates should send information regarding interests and background via email to:

Dr Stephen Brown
