

Correspondence (extramural) conference

The economic crisis in the world has created a new form of scientific conferences – Correspondence. Recently, a scientific conference was understood only direct presentation and discussion of scientific research. Today the intensively developing information technologies make it possible to organize academic debates, so that opponents can be thousands of miles away from each other and thus to fully communicate on topics of interest and find answers to their questions.

The distance scientific conference - it is such a scientific conference, which takes place at a certain period of the conference organizing committee without the participation of the researchers, based on materials submitted their works. At a certain period of the organizing committee for a certain e-mail the participants send their scientific papers, questionnaires and possibly scanned receipts for payment of registration fee for the publication and distribution of the collection. The discussion of scientific papers at the correspondence conference is not made as it occurs in a standard conference. The Conference Organizing Committee publishes a collection of scientific conference. There are the organization and email address of each participant in the collection of scientific conference. The authors of the conference can communicate at the address and discuss current scientific topics in published articles.

The distance correspondence conference is a new form of collection, concentration and processing of scientific information, the collective sharing of views and solutions of actual problems.

The conference participants are aspirants, applicants, researchers, university students, professionals.

The conference participants can continue talking and discussion the questions, have become interested, in a personal correspondence. So nascent at a conference co-operation of representatives of various educational, scientific and social institutions allows the rapid sharing of experience in administrative processes, improve the technology and working methods.

On materials of the conference a collection, distributed to all participants, is published.

The articles of the conference participants are published in the collection of scientific articles with the assignment ISBN.

For publication the articles in the collection it's necessary to send to the Organizing Committee address:

- A request for publication of the article;
- The text of the article.

The documents are provided directly to the Organizing Committee via email.

The Organizing Committee after the publication of collections of scientific papers sends them via regular mail or as PDF files, which accelerates the accumulation and efficiency of scientific information. If the organization conducting the conference has a website, the conference materials may be placed on this site, which facilitates the exchange of information.
