Course description (3-2) [0.50]
This course will introduce students to the diversity of microorganisms, including, bacteria, viruses and fungi, and its impact on everyday life. The interactions of these organisms with both the biotic and abiotic worlds will be discussed. Topics will include the roles of microorganisms in host-pathogen interactions in disease, the beneficial aspects of microorganisms in bioremediation and food production, and their application in biotechnology.
Prerequisite(s): 4.00 credits including (1 of BIOL*1040, BIOL*1070, BIOL*1080, BIOL*1090, CHEM*1040)

Teaching Team
1. Dr. Wendy J. Keenleyside, Course Instructor/Coordinator. Office SSC3506 (Summerlee Science Complex), wkeenley@uoguelph.ca
2. Rohan van Twest, Lab Coordinator/Demonstrator. Office SSC4113, rvantwes@uoguelph.ca
3. Dr. Chris Meyers, Laboratory Demonstrator. Office SSC3507, cmeyer02@uoguelph.ca

Course Schedule
1. Lectures M, W, F 12:30 - 2:20 pm, RICH2529
2. Labs Tues. 2:30-4:20 pm, SSC4102 & Wed. 2:30-4:20 pm, SSC4102

Course Goals
This course serves as the foundation of the Microbiology program. It is designed to capture your interest by introducing you to the relevance of Microbiology in everyday life, discussing the global impact of microbes, and by providing an opportunity for hands-on experience with microbes in a laboratory setting. The course learning outcomes (LOs; A-D) and the specific conceptual details associated with those outcomes (a, b etc.) are listed below. Specific LOs and concepts will be identified at the beginning of each lecture and collectively will be assessed through the various graded components of the course. The list may be updated periodically during the semester, through deletion or addition, depending upon the pace and depth of coverage of a given topic. Course readings, class discussions and group work will also further develop the broader MCB Program Learning Outcomes (MCB Learning Outcomes) and the University of Guelph learning outcomes (UofG Learning Outcomes).

A. ENERGY IN BIOLOGICAL SYSTEMS; METABOLIC PATHWAYS
   By the end of the course, successful students will:
   A1. Demonstrate an understanding that metabolic diversity exists among eukaryotes, prokaryotes and viruses

B. STRUCTURE-FUNCTION RELATIONSHIPS IN BIOLOGICAL SYSTEMS
   By the end of the course, successful students will:
   B1. Demonstrate an understanding of macromolecular interactions, structure and function
   B2. Demonstrate an understanding that the properties of cells are a function of the chemical
structures of their constituent macromolecules
B3. Demonstrate a deep understanding of the roles of cells as the fundamental unit of life
B4. Demonstrate an understanding of how cells, organelles and all major metabolic pathways evolved from early prokaryotic cells
B5. Demonstrate an understanding of communication within and between cells and their environment
B6. Demonstrate an understanding of intracellular trafficking and cellular motility

C. EVOLUTION AND THE FLOW OF GENETIC INFORMATION

By the end of the course, successful students will:
C1. Demonstrate an understanding that mutations, recombination and horizontal gene transfer have selected for a huge diversity of organisms
C2. Demonstrate an understanding that related organisms have a common ancestor
C3. Demonstrate an understanding of the factors that affect the frequency of genotypes and phenotypes in a population over time

D. SCIENTIFIC METHOD

By the end of the course, successful students will:
D1. Describe or assess the appropriate method of visualization and identification of example microbes
D2. Perform experiments using appropriate safety precautions, and microbiological techniques for the isolation, identification and enumeration of representative groups of bacteria, archaea and fungi
D3. Use appropriate and accurate mathematical calculations for microbial enumeration
D4. Successfully interpret and communicate scientific data

Course Content

### Notes:

*a* these are approximate dates and are subject to minor alteration. Lecture 1 is the Friday immediately prior to “week 1” for the labs.

*b* these are subject to minor change. Additional readings related to the 2 Case studies are provided with each case study.

*c* select pages

**b. Labs –**
c. Method of presentation - This course is designed to capture students’ attention and interest; as such classroom teaching will be interactive wherever possible, and centered on microbiology as it pertains to everyday life, current affairs and news items. The lab component consists of 4 2-hour labs and will provide hands-on experience as well as demonstrations. Classes will include Powerpoint slides, group discussions facilitated using a classroom response system (system TBA) and two small case studies that will be researched in groups, with discussion through a Courselink discussion board.

Course Resources

Textbook – the required textbook for this course is “Microbiology - An evolving Science”, 3rd edition by J L Slonczewski and JW Forster (WW Norton Inc, ISBN 0- 393-91929-5). This is available from the bookstore, in hard copy or as an E-book (6 months, 12 months or permanent access) or in the library on 2h reserve (http://www.bookstore.uoguelph.ca/courselistbuilder.aspx ).

Laboratory manual – this is required and may be purchased from SSC 4479 (the MCB Admin Offices), 5 days ONLY: Wed May 11 & Thurs. May 12 from 9–11 am & 1-3 pm, Mon. May 16 – Wed. May 18 from 9-11 am & 1-3 pm

Screencast & lecture videos – lectures will be captured and made available for streaming via Courselink; a screencast (powerpoint with audio) will replace lectures the week of Victoria Day and that .mp4 file will also be available for streaming from Courselink.

Courselink – the course website will be used extensively and will include all relevant course materials, discussion boards, links for additional readings & a course calendar. The last class will occur online through the D2L chat function and will be for review of course material.

PeerWise – this is a free online tool for authoring, answering, commenting on and rating student-authored multiple-choice questions. A site for MICR*2420 S16 will be set up and the class list imported. You will need to create an account (assuming you have not used the tool before) and then select the course. The tool is simple to use but instructions for creating, and for answering, questions, are provided in text as well as video and screencasts. Dr. Keenleyside will provide a few introductory/review questions to the MICR*2420 repository, to help you get started and will briefly discuss Bloom’s taxonomy and the qualities of good, higher level MCQs. There are no grades attached to using PeerWise, however any good quality, higher Bloom’s level questions, will be considered for inclusion in the midterm and final exams, with no upper limit! So you will derive double benefits from authoring and answering/providing feedback on, other questions: you will be learning as you do both, and you raise the likelihood that you will know some questions AND THEIR ANSWERS on the midterm and final exam! https://peerwise.cs.auckland.ac.nz/docs/

Instructor’s office hours – Mondays 2:30-3:30 (drop-in; SSC3506), additional drop-in or virtual office hours tba. Also by appointment.
### Methods of Assessment

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Weight of Assessment</th>
<th>Due Date of Assessment</th>
<th>Course Content /Activity</th>
<th>Learning Outcomes Addressed$^a$</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lecture quizzes$^b$</td>
<td>5%</td>
<td>May 18-20, June 1-3, June 15-17</td>
<td>Non-cumulative on preceding lecture material</td>
<td>#1: A1a; B2a, f; B3; B4; D1</td>
</tr>
<tr>
<td>Case study group quizzes$^c$</td>
<td>5% (2.5% each)</td>
<td>May 30, June 22</td>
<td>Case Study questions</td>
<td>#1: A1d; B1c, d; B2b, f; B5a; D4; E</td>
</tr>
<tr>
<td>Midterm$^d,g$</td>
<td>25 or 0%</td>
<td>June 3</td>
<td>Lectures 1-4/labs 1-2</td>
<td>A1a-d; B2a, f; B3; B4; B6; C2; D1; D4</td>
</tr>
<tr>
<td>Lab</td>
<td>20%</td>
<td>Lab book or data sheets due at end of 5th lab period</td>
<td>5% pre-lab online quizzes; 5% in-lab quizzes; 10% lab exercises</td>
<td>A1; B2c; B3a, c, d; D</td>
</tr>
<tr>
<td>Independent study assignment$^e$</td>
<td>2.25 or 3.5%</td>
<td>June 27 (tested on final exam)</td>
<td>Independent research on chosen organism</td>
<td>A1; B1, 2, 3; D4</td>
</tr>
<tr>
<td>Final exam$^f,g$</td>
<td>45 or 70%</td>
<td>June 27</td>
<td>Cumulative</td>
<td>All but D2 &amp; D3</td>
</tr>
</tbody>
</table>

$^a$ These are subject to change depending on changes in lecture progress. Any changes will be reflected in an updated course outline on Courselink.

$^b$ Lecture quizzes are online, non-cumulative, on preceding lecture material (best 2 of 3). Once begun, every student will have 45 min to complete the quiz; this is at least 3x longer than the time deemed necessary for successful completion (assuming you have done the readings and attended class) – no extra time will be provided.

$^c$ Case studies are done in groups and involve online discussions and/or meetings outside of class time. Case study-associated quiz will be done by groups, in class, using IF-AT cards ([http://www.epsteineducation.com/home/](http://www.epsteineducation.com/home/)).

$^d$ Students who miss the midterm will write a 70% (cumulative) final exam. For students who **DO** write the midterm, but perform better on the final, the midterm grade will be dropped and the grade weight transferred to the final exam. You are strongly encouraged to write the midterm rather than gamble on performing well on the final exam. **The midterm will not be handed back** however there will be ample opportunity to view and discuss midterms.
Investigation of a chosen microorganism (instructions will be provided), done independently throughout the semester and tested on the final exam (5% of final exam grade). Exam questions will represent 5% of the final exam grade. Students cannot bring notes into the exam, so they must study their independent assignment along with the rest of the course material.

Cumulative, includes questions on independent assignment

2-stage midterm & final: consists of individual, followed by group test using IF-AT cards (http://www.epsteineducation.com/home/). Group grade will only be used if it is no lower than the individual grade. Students writing in SAS need to talk to Dr. Keenleyside ASAP

Important Dates

- these will also be identified in the Courselink calendar

<table>
<thead>
<tr>
<th>DATE</th>
<th>DESCRIPTION</th>
</tr>

Course and University Policies

a. UNIVERSITY POLICIES

When You Cannot Meet a Course Requirement
When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons, please advise the course instructor or lab demonstrator in writing, with your name, id#, and e-mail contact, and be prepared to provide supporting documentation. See the undergraduate calendar for information on regulations and procedures for Academic consideration:
http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml

Accessibility
The University of Guelph is committed to creating a barrier-free environment. Providing services for students is a shared responsibility among students, faculty and administrators. This relationship is based on respect of individual rights, the dignity of the individual and the University community's shared commitment to an open and supportive learning environment. Students requiring service or accommodation, whether due to an identified, ongoing disability or a short-term disability should contact the Centre for Students with Disabilities as soon as possible.

For more information, contact CSD at 519-824-4120 ext. 56208 or email csd@uoguelph.ca or see the website: http://www.csd.uoguelph.ca/csd/

Academic Misconduct
The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community – faculty, staff, and students – to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisort.

The Academic Misconduct Policy is detailed in the Undergraduate Calendar:
http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml

E-mail Communication
As per university regulations, all students are required to check their <uoguelph.ca> e-mail account regularly: e-mail is the official route of communication between the University and its students.

Drop Date
The last date to drop 6-week summer courses, without academic penalty, is the 20th class day. To
confirm the actual date please see the schedule of dates in the Undergraduate Calendar. For regulations and procedures for Dropping Courses, see the Undergraduate Calendar: http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml

Copies of out-of-class assignments
Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

Recording of Materials
Presentations which are made in relation to course work—including lectures—cannot be recorded or copied without the permission of the presenter, whether the instructor, a classmate or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

Resources
The Academic Calendars are the source of information about the University of Guelph’s procedures, policies and regulations which apply to undergraduate, graduate and diploma programs: http://www.uoguelph.ca/registrar/calendars/index.cfm?index

b. INSTRUCTOR POLICIES

Grading
Assignments, reports, quizzes/tests: lab reports are due by 2:30 pm on the due date; the time for submission of other assignments will be announced. For ALL assignments/reports, deductions for late submissions will be 10% per day (the weekend will cost a 20% grade reduction), up to a 30% deduction. After 3 days, the submission will not be accepted. Lab quizzes are written at the beginning of the lab periods; please contact Rohan if you have valid grounds for being unable to complete one or more of these – you may be able to write the quiz later, or simply drop that particular quiz from the lab quiz grade – however this requires documentation. See above for information on academic consideration.

Student responsibilities
1. Participation and completion of laboratory components is mandatory. If you cannot attend a laboratory session, and have valid grounds, please e-mail Rohan to provide your documentation and enquire about making up the missed activities.
2. Standard operating procedures for laboratory participation - you must have read the relevant laboratory exercise in advance of the lab, and completed the associated online lab quiz, prior to coming to the lab. A flow chart for what you will be doing in the lab is an excellent way to ensure you are well prepared to complete the exercises quickly, and efficiently. You must bring with you: closed-toed shoes, a lab coat, your lab manual, an elastic for long hair, and a notebook. If you wear contact lenses, you must also bring safety glasses.
3. Student conduct:
   a. Students are responsible to their lab partners and case study group members. Lab partners are expected to work collaboratively, to communicate effectively with each other and the demonstrators, and to hand in independently written lab books. Students are expected to work independently and collaboratively, as well as respectfully, with their case study group members, in order to maximize the group’s success on the case study quiz.
b. Technology in the classroom: you are welcome to bring your laptop to lectures, but only use it for activities related to this course and in a manner that will not disturb those around you. Turn your cell phone on silent, and do not text-message during class.

CAMPUS RESOURCES

The Academic Calendar is the source of information about the University of Guelph’s procedures, policies and regulations which apply to undergraduate, graduate and diploma programs: http://www.uoguelph.ca/registrar/calendars/index.cfm?index

If you are concerned about any aspect of your academic program:

• make an appointment with a program counsellor in your degree program. http://www.bsc.uoguelph.ca/index.shtml or https://www.uoguelph.ca/uaic/counselling

If you are struggling to succeed academically:

• There are numerous academic resources offered by the Learning Commons including, Supported Learning Groups for a variety of courses, workshops related to time management, taking multiple choice exams, and general study skills. You can also set up individualized appointments with a learning specialist. http://www.learningcommons.uoguelph.ca/

If you are struggling with personal or health issues:

• Counselling services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance. https://www.uoguelph.ca/counselling/
• Student Health Services is located on campus and is available to provide medical attention. https://www.uoguelph.ca/studenthealthservices/clinic
• For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations. http://www.uoguelph.ca/~ksomers/

If you have a documented disability or think you may have a disability:

• The Centre for Students with Disabilities (CSD) can provide services and support for students with a documented learning or physical disability. They can also provide information about how to be tested for a learning disability. For more information, including how to register with the centre please see: https://www.uoguelph.ca/csd/
