

DISTINGUISHED SPEAKER SEMINAR SERIES

Seminars are held alternating Wednesdays at 12:30 pm ****ANNU 156 (W12)****

Fall 2011

Winter 2012

Sep. 21	<p>DR. ROSS N. NAZAR</p> <p>Professor, Department of Molecular and Cellular Biology, University of Guelph "Termination, Quality Control and Biological Torpedoes" Host: Dr. Jane Robb</p>	Jan. 18	<p>DR. DAPHNE GORING</p> <p>CRC and Professor, Department of Cell and Systems Biology, University of Toronto "The Plant U-box/ARM E3 ligases as potential intracellular signalling proteins for S-Domain Receptor Kinases" Host: Dr. Steven Rothstein</p>
Oct. 5	<p>DR. BRENDA ANDREWS</p> <p>Director, Donnelly Centre, Professor & Chair, Banting and Best, University of Toronto "Exploring Biological Pathways using Yeast Functional Genomics" Host: Dr. George van der Merwe</p>	Feb. 1	<p>DR. ROSS CAGAN</p> <p>Professor, Developmental and Regenerative Biology, Mount Sinai Medical Centre "A Fly Approach to Cancer and Diabetes Therapeutics" Host: Dr. Nina Jones</p>
Oct. 19	<p>DR. CHRISTOPHER MCCULLOCH</p> <p>CRC and Professor, Matrix Dynamics Group, Faculty of Dentistry, University of Toronto "Inflammatory signaling through focal adhesions" Host: Dr. John Dawson</p>	Feb. 15	<p>DR. JOHN F. RAWLS</p> <p>Assistant Professor, Department of Cell and Molecular Physiology, University of North Carolina "Host-microbe symbiosis in the zebrafish intestine" Co-Hosts: Dr. Emma Allen-Vercoe, Dr. Terry Van Raay</p>
Nov. 2	<p>DR. MICHAEL G. ROSSMANN</p> <p>Hanley Distinguished Professor of Biological Science, Purdue University "Conformational changes in enveloped viruses during maturation and fusion" Host: Dr. Matt Kimber</p>	Feb. 29	<p>DR. THOMAS J. SILHAVY</p> <p>Warner-Lambert Parke-Davis Professor of Molecular Biology, Princeton University "Outer membrane biogenesis in gram-negative bacteria" Host: Dr. Chris Whitfield</p>
Nov. 16	<p>DR. L. ANDREW STAEHELIN</p> <p>Professor, Molecular, Cellular and Developmental Biology, University of Colorado "Elucidating the nanoscale world of cells via electron tomography" Host: Dr. John Greenwood</p>	Mar. 28	<p>DR. MICHAEL F. THOMASHOW</p> <p>Director, Plant Research Lab, University Distinguished Professor, Michigan State University "Transcriptional Regulatory Networks Controlling Plant Freezing Tolerance" Co-Hosts: Dr. Annette Nassuth, Dr. Joe Colasanti</p>
Nov. 30	<p>DR. K. ANDREW WHITE</p> <p>CRC and Professor, Department of Biology, York University "How Long-range RNA Interactions Control RNA Virus Reproduction" Co-Hosts: Dr. Baozhong Meng, Dr. Peter Krell</p>	Apr. 11	<p>DR. DAVID P. BAZETT-JONES</p> <p>CRC, Senior Scientist, The Hospital for Sick Children, Director, Advanced Bioimaging Centre, Professor, Biochemistry, University of Toronto "So what is the real function of chromatin?" Host: Dr. Cezar Khursigara</p>

Coffee, Tea & Timbits!

A great opportunity to hear leading researchers in the scientific community discuss their work!

All Welcome to Attend!
