

## The Dr. Donald Robert Phillips Molecular & Cellular Biology Scholarship

In honour of the occasion, the 2011 recipients  
will present Departmental seminars on their work:

### **Perrin Baker**

"Elucidating the mechanism and specificity of BphI-BphJ,  
an aldolase-dehydrogenase complex involved in the  
degradation of polychlorinated biphenyls (PCBs)"

### **Salim Islam**

"Understanding O-Antigen Assembly in  
*Pseudomonas aeruginosa*: To Topology...and Beyond"

**Thursday, August 4, 2011**

**9:00 – 11:30a.m.**

**ROZH 102**

*Refreshments will be provided.*

*Awards will be presented prior to the seminars.*

Please come and congratulate Perrin and Salim!

Chris Whitfield, Professor, CRC and Department Chair  
Department of Molecular and Cellular Biology
