

2016 Research Grants Competition

In total, 65 U of G projects received funding, spanning five colleges and numerous departments, with most being supported for five years. **June 23, 2016**

**Congratulations to the following faculty recipients
in the department of Molecular and Cellular Biology!**

Applicant Name	Program	Title	Awarded Amount
Baker, Mark	RGPIN	Genetic analysis of early events in mammalian homologous recombination in vivo	\$29,000.00
Clarke, Anthony	RGPIN	Activity, control and inhibition of lytic transglycosylases	\$50,000.00
Graether, Steffen	RGPIN	The in cell structure and function of an intrinsically disordered plant stress protein	\$42,000.00
Khursigara, Cezar	RTI	Live Cell Imaging Upgrades to Quorum Diskovery Spinning Disk Microscope System	\$129,010.00
Mosser, Richard (Dick)	RGPIN	Role of HSP70 in the regulation of miRNA biogenesis in heat stressed cells	\$36,000.00
Van Raay, Terence	RGPIN	Regulation of Wnt Signaling in Development	\$25,000.00
