

READ AND BE INFORMED ABOUT YOUR VOTE FOR UNDERGRADUATE REPRESENTATIVES ON SENATE!

For students in the BACHELOR OF APPLIED SCIENCE program - Your candidates are:

Samantha Jones, B.A.Sc. Child, Youth & Family Studies, 4th Year

Hello my name is Samantha; I am a student in the Child, Youth and Family program. I would like to be elected for Senate so that I can make a difference in the way admittance and scholarships for transfer and mature students coming into our program are granted. I am a student who took a couple years off after high school and knows that the application process has its differences. I would also really like to work at making it possible for all programs under the Bachelor of Applied Science to have minors or double majors.

Ali Zaki, B.A.Sc.

Students of this University want a representative who is sensitive to our needs. And we need a representative who takes action to address those needs. When I felt that students couldn't access the Student Food Bank due to restricted hours of operation, I volunteered my time to keep the Food Bank open longer. Similarly, I am the founder and president of the ESL Club, a student-run organization that enhances English use for University of Guelph students whose first language is not English. This election vote for someone who is experienced, dedicated, and gets results. This election, vote for Ali Zaki.

For students in the BACHELOR OF SCIENCE program - Your candidates are:

Kirthana Suganathevan, B.Sc. Human Kinetics, 3rd Year

I believe that a good leader is composed of integrity, passion and commitment to the pursuit of excellence. I believe that a leader's greatest tool is communication. Communication is the key to success, and with that being said if elected as B.Sc. Senator I will ensure that there is an active flow of communication between the senate and the student body regarding all academic issues. With the increasing changes in the curriculum I will defend the students' best interests in university matters by advocating for every student on all academic issues and voicing not only your concerns but our concerns.

Mythri Viswanathan, B.Sc. Molecular Biology and Genetics, 3rd Year

My name is Mythri Viswanathan and I am a third year Molecular Biology & Genetics student. Having been a senator for this past term I am excited at the opportunity to represent my peers again during the 2012-2013 academic year. With a variety of experience from involvements around campus such as Peer helping, being a Central Students Association board member as well as a past member of the College of Biological Sciences Student Council I hope to offer a fair and honest representation of all B.Sc students. I would like to thank you for considering me, Mythri Viswanathan for B.Sc Undergraduate Student Senator 2012-2013.

Naythrah Thevathasan, B.Sc. College of Biological Sciences, 2nd Year

I am a second-year Bio-Medical Science student and I am hoping to be re-elected as a B.Sc student representative on the Senate. This past year serving as a Student Senator has taught me so much about the governance at the University and the impact our voices carry as students in the decision making on campus. I hope that if elected for the 2012-2013 term as a B.Sc Student Senator, I will be able to continue to be an ambassador for academic change and strive to adequately represent the voice of all students among the various disciplines of science across campus.

Daniel Frank, B.Sc. Human Kinetics, 3rd Year

My name is Dan Frank and I am a 3rd year Human Kinetics student. Ever since high school, I have always been involved in student government, as I was a member of the Rainbow District School Board Student Senate. When I entered University, I immediately got involved by joining the College Of Biological Science Student Council (CBSSC). I have been a student governor on the CBSSC for a total of three years, and feel that I have an adequate amount of experience and dedication to be an effective contribution to the Senate. I would be honoured if I were given this opportunity to represent all BSc students during the 2012-2013 school year.

Sofia Oke, B.Sc. Toxicology, 2nd Year

Each year brings new opportunities for us to enhance our educational experience at the University of Guelph. Whether with respect to supporting more opportunities for collaboration between students in various majors, or allowing students the chance to more easily supplement their education with courses that don't necessarily lie within the bounds of their curriculum, I look forward to ensuring the interests of B.Sc. students are best represented. As a student senator I hope to allow for the advancement of unique interdisciplinary projects for students. There is no better time to ignite positive change than the present, vote Sofia Oke for Senate!
