

Test Preparation Checklist

Before taking any tests ask yourself the following questions:

1. Do you regularly attend lectures?
2. Do you review the class material at the end of the day and before you attempt the homework?
3. Did you do all the homework questions?
4. Did you follow up on difficulties with homework? (see below)
5. Did you go beyond the homework questions and notes and make a serious attempt to understand the material?
6. Do you attend the Math & Stats Learning Centre for help?
7. Did you consult with the teaching assistants or me during office hours when you were having trouble with something?
8. Did you get a reasonable night's sleep before the test?

The more “Yes” responses you answered, the better prepared you are for a test.
