

Fish

Diseases and Disorders

Volume 1 Protozoan and Metazoan Infections

2nd Edition

Edited by P.T.K. Woo, University of Guelph, Canada

As in the first edition, the focus of this second edition is on parasites that cause disease in fish. Its primary objective is to produce a comprehensive and authoritative review from experts who are actively working in the area or have contributed to the understanding of the disease/disorder. Significant changes to this second edition include the addition of three new chapters and four of the original chapters have new authors. All other chapters have been thoroughly updated since the first edition was published in 1995. This book will be of significant interest to researchers and students of aquaculture, fisheries, parasitology and veterinary medicine.

From reviews of the first edition:

"This is bound to become the a standard work and all libraries simply must purchase it"

Journal of Fish Diseases

"Amid the recent publications in fish parasitology, this volume stands as one of the best"

Journal of Aquatic Animal Health

"Overall, this is a superb text...and should be on the bookshelves of all self-respecting parasitologists"

International Journal for Parasitology
