# Knowledge Transfer Topics

- Parasite monitoring
- Natural chemical miticide treatments
- Miticide safety and efficacy
- Breeding bees for parasite resistance

# Social Media - Youtube Channel

The image shows a screenshot of the YouTube channel page for the University of Guelph Honey Bee Research Centre. The channel has 58.7K subscribers and is currently subscribed to. The page features a navigation menu on the left with options for Home, Explore, Subscriptions, and Library. The main content area displays the channel's banner image, which is a close-up of a honeycomb with a bee in the center. Below the banner, the channel name and subscriber count are shown, along with a 'SUBSCRIBED' button and a notification bell icon. The navigation tabs include HOME, VIDEOS, PLAYLISTS, COMMUNITY, CHANNELS, and ABOUT. The 'Created playlists' section is visible, showing five playlists: 'Low Varroa Growth' (4 videos), 'Honey Harvesting' (4 videos), 'Pest Management' (4 videos), 'Getting Started With Bees' (6 videos), and 'Working With Bees' (3 videos). Each playlist has a 'VIEW FULL PLAYLIST' link below it.

## Featured Articles

### Research Brief: Use of Oregano to Control Parasitic Mites in Honey Bees

Varroa mite is a tick-like parasite that feeds on the blood and fat tissue of immature and adult bees.

### Donor Spotlight: Lydia Luckevich

The more we know about honey bees, their behaviours, risk factors and optimum environment, the better we can promote their health...

### Product Feature: Honey Tasting and Grading

Here at the HBRC, our team took some time to taste three different types of honey originating from different locations in Ontario, Canada.

### Volunteer Spotlight: Pia Marquardt

"I always find it amazing that every year people start in the spring and they are new at everything, but by the time September rolls around they are so good at it,"
