

Overcoming Challenges in Male Dairy Calves

—

Dave Renaud

November 22, 2021

KTT Mobilization Initiative

- Based on previous work that identified several key factors impacting male calf health when they reached calf raising facilities
 - Body weight at arrival
 - No abnormal clinical signs
 - Achieved successful transfer of immunity from colostrum

KTT Mobilization Initiative

- Based on previous work that identified several key factors impacting male calf health when they reached calf raising facilities
- Audiences targeted
 - Dairy producers
 - Veal producers
 - Advisors (veterinarians and nutritionists)

KTT Mobilization Initiative

- Based on previous work that identified several key factors impacting male calf health when they reached calf raising facilities
- Audiences targeted
- **Project outputs**

KTT Mobilization Initiative

- Based on previous work that identified several key factors impacting male calf health when they reached calf raising facilities
- Audiences targeted
- Project outputs
- Importance of this initiative
