OFFICE HOURS: Tuesday 2:30-3:30 or by appointment
LAB HOURS: To be scheduled in the first week of classes

CALENDAR DESCRIPTION:

An introduction to computer technologies as they apply to the creation and manipulation of music. Topics will be drawn from the areas of sound synthesis and processing, recording, encoding, and transcription. The course will include a classroom and an applied component.

Prerequisite(s): MUSC*1180 or MUSC*2180. Some computer experience is recommended.

COURSE DESCRIPTION:

To give students an overview of the scope of music technology through practical exposure to a variety of software and hardware components, along with their theoretical concepts, terminology, and relevant history, including important recordings.

BACKGROUND SKILLS:

Basic music theory and rudiments. Keyboard skills an asset. Performance skills on any instrument welcome. Rudimentary knowledge of computer operating systems.

LEARNING OUTCOMES:

To give students an overview of the scope of music technology through practical exposure to a variety of software and hardware components, along with their theoretical concepts, terminology, and relevant history, including important recordings.

Aims:

- To develop an understanding of concepts of digital audio and music technology that are more universal than the particulars of the equipment and software used in the course
- To learn about and apply some of the processes involved in making music with computers
- To listen to innovative electroacoustic works of all styles and learn to identify production techniques through critical aural analysis.
