DISCOVER THE PAST CREATE OUR FUTURE

HISTORY AT GUELPH

Our students find their voices and their own original insight into the world, past and present. We offer:

- courses covering the globe
- ranging from ancient to contemporary history
- thematic courses on topical issues like food and health, politics and revolution, environmental change, crime and justice, popular culture, gender, and more
- a diversity of class sizes and learning experiences
- mentorship by dedicated and approachable professors who love what they do!

For more information: histsec@uoguelph.ca

STUDY ABROAD

Our students may study for a semester in **Paris, London, Kraków** or **Shanghai** supervised by Department faculty. While abroad, students keep up with their coursework while absorbing new experiences with a tight-knit cohort.

WORK STUDY

Historians are **experts at vetting evidence** of all kinds. Our students may participate in **hands-on projects** evaluating historical records for the public. In our Digital Humanities seminar, students help the Library digitize Scottish chapbooks for a website on the evolution of fairy tales.

A VERSATILE DEGREE

“Many people have asked me during my undergrad years, ‘**what do you do with a History degree?**’ I always reply ‘**essentially anything.**’

I work as an Archaeologist at an engineering company carrying out Cultural Resource Management (CRM) surveys. This job has allowed me to travel across Ontario’s rural landscape and see beautiful places that have been lost to history, including pre-historic, archaic and paleolithic sites, which I will never forget. Take initiative; the future is incredibly bright for students with a History Degree!”

- Joe Cull (BA ‘14)

Professions and professional schools look for young people with **broad training, adaptable skills,** and **clear judgment.** Our graduates are versatile and intelligent communicators and problem solvers who follow their passions in business, law, education, civil service, education, journalism and the arts.
