1.2 Course Description

This course is designed to equip you with the traditions and practice of observational painting. Through completing exercises, assignments, and an interconnected suite of projects, you will achieve a basic competency in representational painting. Together we will explore key technical fundamentals which will aid your own artistic direction for the future. The ability to create convincing form and illusionistic space can be used to share a personal vision. This is understood within both historical and contemporary contexts.

You will have the opportunity to learn important, long-term practical skills, such as: how to set up an effective working space, and health and safety protocols. Through your full participating in this course, you will make connections that may extend well beyond the classroom!

We will look at both historical and contemporary work, see how they relate to each other and critically consider context and underlying assumptions. It will be helpful if you have

some experience with drawing from observation. The course projects are structured logically to introduce the fundamentals of painting and then to the primary subjects of self-portrait, still life and interior. The final project will ambitiously interweave all three.

NOTE: This is a 0.5 credit course. Each week, students are expected to spend approximately five hours outside of class on related course work.

Method of Presentation: Each project will be introduced by a lecture and discussion. Short in-class exercises, games and technical experimentation are also designed to prepare you for each project. After the presentation date, a PDF of the image files will be posted to Courselink for your reference. Individual guidance is a key part of this course. Classes designated as 'work periods' are designed to maximize tailored and individual instruction. While Courselink will be the primary site for all course documents, we will also use Teams (or Zoom) to supplement any time we may lose in real life.
