Synchronous vs Asynchronous

Synchronous: Learning that occurs with real-time interaction

Pro
- More engaging
- Active discussions
- Real-time participation
- Peer interaction

Cons
- Schedule may not accommodate all students
- Technical difficulties
- AODA issues
- A quiet area may not be available

Zoom

Teams

Asynchronous: Learning that occurs without real-time interaction

Pro
- Flexible Schedule
- Self-regulated
- Increased accessibility for students with disabilities
- Accommodates unexpected challenges that may arise

Cons
- Isolated
- No immediate feedback from students and faculty
- No real-time contact
- Requires significant student initiative

Youtube

Textbooks

In general, while both learning types have their advantages and disadvantages, ultimately, it is up to faculty members to determine which method will be the most effective. Click **HERE** for more information
