

presents a

Special Guest Lecture

How Instructional Videos Changed
Teaching and Learning in
an Introductory Biology Course

featuring
Peter White
Michigan State University

Thursday, November 15, 9:30 am
SSC1511

All are welcome to attend, so please spread the word.
Light refreshments will be available.

A Word from Pete:

"My approach to teaching and learning is rooted in three main principles. First, learning environments should be interactive and learning-centered. Second, instruction should employ backward design, focusing on higher-order learning outcomes. Finally, students should be given the opportunity to engage in authentic scientific investigations, learning science by doing science. These three principles are widely regarded as best-practice principles, supported by a wide array of empirical studies. My pedagogical approach is geared at shrinking the divide between instructor and student."
