

# ENGG\*3130 Modelling Complex Systems

Winter 2019

Section(s): C01

School of Engineering

Credit Weight: 0.50

Version 1.00 - January 05, 2019

---

## 1 Course Details

### 1.1 Calendar Description

This course explores the application of systems thinking to complex global issues. Key topics will include: systems theory, complex adaptive systems, systems tools, and systems approaches. The course will emphasize the role of computational modelling and simulation as a central tool for applying systems thinking to real-world settings.

**Pre-Requisite(s):** CIS\*1500, ENGG\*2400, STAT\*2120

### 1.2 Course Description

This course aims to introduce the basic principles of systems thinking. We will see how complex patterns and behaviours can emerge from simple structures and rules. We will draw on these insights to develop a deeper understanding of the world around us.

Examples presented in class will be chosen to relate directly to students' experiences and focus on current issues. These may include globalization, climate change, conflict, democracy, cryptocurrency, artificial intelligence, health, and food security.

### 1.3 Timetable

#### Lectures:

Tuesday	14:30–15:50	MCKN 312
Thursday	14:30–15:50	MCKN 312

**Laboratory:**

Wednesday      08:30 - 10:20      THRN 1313

**1.4 Final Exam**

There is no final exam.

---

**2 Instructional Support****2.1 Instructional Support Team**

**Instructor:** Matthew Saunders  
**Email:** msaund05@uoguelph.ca  
**Telephone:** +1-519-824-4120 x53916  
**Office:** RICH 1506  
**Office Hours:** Monday 14:00–15:00

**Instructor:** Þorsteinn Jónsson  
**Email:** tjonsson@uoguelph.ca  
**Office:** RICH 3529  
**Office Hours:** TBD

**2.2 Teaching Assistant(s)**

**Teaching Assistant:** Hannah Szentimrey  
**Email:** szentimh@uoguelph.ca  
**Office Hours:** TBD

---

**3 Learning Resources****3.1 Required Resource(s)****Course Website (Website)**

<https://courselink.uoguelph.ca/>

Course material, news, announcements, and grades will be regularly posted to the ENGG\*3130 [CourseLink](https://courselink.uoguelph.ca/) site. You are responsible for checking the site regularly.

**Think Complexity: Complexity Science and Computational Modeling (Textbook)**

Allen B. Downey, 2nd edition, O'Reilly, 2017

Note that this book is available as a free PDF at <http://greenteapress.com/complexity/>. The second edition is still in development and not yet available in print.

**Thinking in Systems: A Primer (Textbook)**

Donella H. Meadows, 1st edition, Chelsea Green Publishing, 2008.

**3.2 Additional Resource(s)****Lecture Information (Notes)**

Notes to accompany lectures will be available at <http://engg3130.github.io>. Because these notes are a collaborative effort, they will be updated as the course progresses (usually at least once per week). Every student is expected to contribute to the development and maintenance of these course notes. Information on how to contribute, as well as how to generate the notes in alternative formats (e.g. PDF) will be provided.

**Lab Information (Notes)**

The directives for all the lab sessions will be provided in the online course notes. Deliverables for the labs will be submitted electronically (via CourseLink Dropbox) and are due one week after the lab session. Attendance at labs is mandatory.

**Miscellaneous Information (Other)**

Other information related to Modelling Complex Systems will be posted on the course website.

**4 Learning Outcomes****4.1 Course Learning Outcomes**

By the end of this course, you should be able to:

1. Synthesize his or her own definition of systems thinking.
2. Construct a system study, first identifying the system to be investigated and its important behaviours. Identify the purpose of the study, hierarchy, important processes and structures, elements and their interconnections, feedbacks, and environmental context.
3. Discuss real world systems that demonstrate nonlinear, emergent, self-organizing, and resilient behaviour.
4. Choose from a variety of systems tools given a context, justifying the choice.
5. Model and simulate a complex system in software.
6. Write code that demonstrates good software engineering practices: e.g. modularity, efficiency, use of appropriate data structures and algorithms, readability.
7. Communicate a systems approach to modelling both orally and in written form.

**4.2 Relationships with other Courses & Labs**

**Previous and/or Current Courses:**

**ENGG\*1500:** Solving systems of linear equations, matrix algebra, complex numbers

**CIS\*1500, CIS\*2500, CIS\*2430, CIS\*2520:** Object-oriented programming, data structures, analysis of algorithms

**PHYS\*1130:** Analytic problem solving, physical systems

**STAT\*2120:** Bayes' theorem, probability distributions, probability densities, descriptive statistics

**ENGG\*2400:** Modelling and simulation of linear systems

### Follow-on Courses:

**ENGG\*41x:** Interdisciplinary design

## 5 Teaching and Learning Activities

### 5.1 Lecture

<b>Topic(s):</b>	Introduction and Overview
<b>Topic(s):</b>	Systems Structure and Behaviour
<b>Topic(s):</b>	Complexity Science
<b>Topic(s):</b>	Graphs
<b>Topic(s):</b>	Feedback Loops: One-Stock Systems
<b>Topic(s):</b>	Analysis of Algorithms
<b>Topic(s):</b>	Feedback Loops: Two-Stock Systems
<b>Topic(s):</b>	Small World Graphs

<b>Topic(s):</b>	Why Systems Work So Well
<b>Topic(s):</b>	Scale-Free Networks
<b>Topic(s):</b>	Why Systems Surprise Us
<b>Topic(s):</b>	Cellular Automata
<b>Topic(s):</b>	System Traps and Opportunities
<b>Topic(s):</b>	Game of Life
<b>Topic(s):</b>	Physical Modelling
<b>Topic(s):</b>	Leverage Points – Places to Intervene in a System
<b>Topic(s):</b>	Systems Case Study (Guest Lecture)
<b>Topic(s):</b>	Self-Organized Criticality
<b>Topic(s):</b>	Currency and Consensus (Guest Lecture)
<b>Topic(s):</b>	Agent-Based Models
<b>Topic(s):</b>	Artificial Intelligence and Machine Learning
<b>Topic(s):</b>	Living in a World of Systems
<b>Topic(s):</b>	Oral Presentations (1)
<b>Topic(s):</b>	Oral Presentations (2)

## 5.2 Other Important Dates

Monday, January 7 2019: First day of class (No lab)  
Monday, February 18 – Friday, February 22 2019: Winter Break  
Friday, March 8 2019: drop date – 40th class  
Friday, April 5 2019: last day of class

---

## 6 Assessments

### 6.1 Marking Schemes & Distributions

Name	Scheme A (%)
Game Playing Exercises (Teams of 5–6 students)	10
Course Notes Development	10
Lab Reports	40
Oral Presentation	10
Final Project (Teams of 3–4 students)	30

Name	Scheme A (%)
Total	100

## 6.2 Assessment Details

### Game Playing Exercises (Teams of 2–3 students) (10%)

Learning Outcome(s): 1,2,3,7

- Each group of 2–3 students will have the opportunity to lead a game-playing exercise as well as a debriefing session during a lecture period
- The games will be selected from the *Systems Thinking Playbook* by the instructor, to reinforce topics in the course: <http://www.chelseagreen.com/the-systems-thinking-playbook>

### Course Notes Development (10%)

Learning Outcome(s): 4,6

- Each student should make individual contributions to the course notes
- Students will be assessed on the **quantity and quality** of the contributions, which may include:
  - Being the primary note taker for one lecture session (we will schedule this so that everyone has an opportunity to collaborate)
  - Correcting errors or making additions to existing notes (or labs, )
  - Opening issues and participating in discussion where more clarification is needed  
<https://guides.github.com/features/issues/>
  - Responding to these issues
- Contributions must be submitted as a Github pull request  
<https://help.github.com/articles/about-pull-requests/>

### Lab Reports (40%)

Learning Outcome(s): 2,3,4,5,6

- Lab reports will be submitted as Jupyter notebooks. They are due (by CourseLink Dropbox) exactly one week from the start of the lab
- There will be 10 labs
- Lab reports will be marked according to a ternary scheme:
  - High pass (more than average effort, essentially complete)
  - Pass (reasonable effort, may be missing some components)
  - Fail (less than average effort, mostly incomplete)
- The two lab reports with the lowest grade will be dropped. However, **reports**

**that are not submitted will not be dropped.**

### Collaboration Policy

I expect you to try solving each lab on your own. However, when you are stuck on a problem, I encourage you to collaborate with other students in the class, subject to the following rules:

1. You may discuss a problem with any student in this class, and work together on solving it. This can involve brainstorming and verbally discussing the problem, going together through possible solutions, but should not involve one student telling another a complete solution.
2. Once you solve the problem, you must write up your report on your own, without looking at other people's reports or giving your report to others.
3. In your solution for each problem, you must write down the names of any person with whom you discussed it. This will not affect your grade.
4. Do not consult solution manuals or other people's solutions from similar courses. However, you are encouraged to make use of open source tools and libraries unless otherwise instructed. Don't reinvent the wheel — just give proper attribution. If unsure, ask the instructor.

### **Oral Presentation (10%)**

**Learning Outcome(s):** 1,2,3,7

- Each student will research and present a 5 minute talk on a prominent systems thinker
- The talks will be given towards the end of the term (details about signing up will be posted on CourseLink)

### **Final Project (Teams of 3–4 students) (30%)**

**Learning Outcome(s):** 2,3,4,5,6

- The project will focus on a case study of complex system modelling
- See the “Think Complexity” book (version 1) for examples of case studies written by students
- Details on formatting and deliverables will be provided before reading week
- Deliverables (report and associated code) are due April 14 2019 at 23:59 via CourseLink Dropbox

# 7 Course Statements

## 7.1 Course Grading Policies

### Missed Assessments

If you are unable to meet an in-course requirement due to medical, psychological, or compassionate reasons, please email the course instructor. See the undergraduate calendar for information on regulations and procedures for Academic Consideration:

<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

### Accommodation of Religious Obligations

If you are unable to meet an in-course requirement due to religious obligations, please email the course instructor within two weeks of the start of the semester to make alternate arrangements. See the undergraduate calendar for information on regulations and procedures for Academic Consideration of Religious Obligations:

<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-accomrelig.shtml>

### Passing grade

The passing grade is 50%.

### Missed labs

If you miss a lab due to grounds for granting academic consideration or religious accommodation, you are expected to complete the necessary work on your own time and still submit a report. There will be no makeup labs.

### Questions concerning grades

If you have questions about the grade you received, please ask your TA within one week of the document being returned. However, all requests for re-marking must be made to the instructor. Any item that is re-marked will be re-marked entirely. Therefore it is strongly suggested that you thoroughly review your entire document **before** making a re-marking request. Pencil-written works will not be re-marked. Re-marking requests will not be honoured more than one week after the document has been returned.

## 7.2 Communication and Email Policy

Please use lectures and tutorials as your main opportunity to ask questions about the course. Major announcements and/or changes will be posted to the course website. **It is your responsibility to check the course website regularly.**

Electronic communication should be limited to the course forum, however topics of a personal and confidential nature (e.g. marks) should be emailed to the instructor: msaund05@uoguelph.ca. Please note that **all email communication must be made through your University of Guelph email account** (i.e. [username@uoguelph.ca](mailto:username@uoguelph.ca)).

## 7.3 Turnitin

In this course, your instructor will be using Turnitin, integrated with the CourseLink Dropbox tool, to detect possible plagiarism, unauthorized collaboration or copying as part of the ongoing efforts to maintain academic integrity at the University of Guelph.

All submitted lab reports and projects will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the Usage Policy posted on the Turnitin.com site.

A major benefit of using Turnitin is that students will be able to educate and empower themselves in preventing academic misconduct. In this course, you may screen your own assignments through Turnitin as many times as you wish before the due date. You will be able to see and print reports that show you exactly where you have properly and improperly referenced the outside sources and materials in your assignment.

---

# 8 School of Engineering Statements

## 8.1 Instructor's Role and Responsibility to Students

The instructor's role is to develop and deliver course material in ways that facilitate learning for a variety of students. Selected lecture notes will be made available to students on Courselink but these are not intended to be stand-alone course notes. Some written lecture notes will be presented only in class. During lectures, the instructor will expand and explain the content of notes and provide example problems that supplement posted notes. Scheduled classes will be the principal venue to provide information and feedback for tests and labs.

## 8.2 Students' Learning Responsibilities

Students are expected to take advantage of the learning opportunities provided during lectures and lab sessions. Students, especially those having difficulty with the course content, should also make use of other resources recommended by the instructor. Students who do (or may) fall behind due to illness, work, or extra-curricular activities are advised to keep the instructor informed. This will allow the instructor to recommend extra resources in a timely

manner and/or provide consideration if appropriate.

### **8.3 Lab Safety**

Safety is critically important to the School and is the responsibility of all members of the School: faculty, staff and students. As a student in a lab course you are responsible for taking all reasonable safety precautions and following the lab safety rules specific to the lab you are working in. In addition, you are responsible for reporting all safety issues to the laboratory supervisor, GTA or faculty responsible.

---

## **9 University Statements**

### **9.1 Email Communication**

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

### **9.2 When You Cannot Meet a Course Requirement**

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Graduate Calendar - Grounds for Academic Consideration

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

### **9.3 Drop Date**

Courses that are one semester long must be dropped by the end of the fortieth class day; two-semester courses must be dropped by the last day of the add period in the second semester. The regulations and procedures for course registration are available in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Graduate Calendar - Registration Changes

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-reg-regchg.shtml>

### **9.4 Copies of Out-of-class Assignments**

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

## 9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance and not later than the 40th Class Day.

More information can be found on the SAS website  
<https://www.uoguelph.ca/sas>

## 9.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community—faculty, staff, and students—to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct  
<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

Graduate Calendar - Academic Misconduct  
<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

## 9.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless

further permission is granted.

## **9.8 Resources**

The Academic Calendars are the source of information about the University of Guelph's procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.

Academic Calendars

<https://www.uoguelph.ca/academics/calendars>
