Catalyst Reading Week 2022

Guelph: Opioid Crisis and Community Care

The opioid crisis is worsening in many communities across the country, including Guelph, at an alarming rate. Between 2020 & 2021, fatalities increased by 242% in the Guelph Wellington-Dufferin counties. In 2020, 2600 lives were lost in Ontario. Myths and misunderstandings about opioids run rampant in our society as those who are dependent on opioids or receiving treatment are widely stigmatized.

In partnership with local community members and agencies, you will learn about the complex issues, lived experiences, and community supports associated with the ongoing opioid epidemic, substance use & modern harm reduction practices. Over the course of the program, you will explore topics including substance use, stigma, harm reduction, community care, mutual aid & peer support initiatives, health including mental health, housing, poverty, the law and de/criminalization.

Activities include immersive community-engaged learning with community support workers and social change agencies through dialogue, workshops, site visits and trainings to address the ongoing epidemic.

PARTICIPATION CRITERIA: Able to commit to full length of program. Open to students of all academic backgrounds.
