### Endowment Funds Results Overview

(Gross Returns for the 12 months ended June 30<sup>th</sup>, 2015)

The Total Endowment Funds returned 8.2% for the last 12 months versus 11.1% for the benchmark.

#### Canadian Equity

- The Canadian equity portfolio lost 3.5% over the past year, 2.3% below the return of the S&P/TSX index.
- Both the plan's Canadian equity managers (Burgundy, Sionna) underperformed the index for the year.
- The lack of dedicated small cap exposure helped returns as small caps underperformed large caps by more than 13% over the past year.

#### Non-North American Equity

- In Canadian dollars, non-North American equity underperformed the U.S. but outperformed Canada with a return of 12.7% for developed markets and 11.6% for emerging markets.
- The developed markets managers (with 17.3% of the total endowment funds) performed poorly in the past year. LSV and Tweedy Browne underperformed the MSCI EAFE benchmark by 0.5% and 3.1% respectively.
- The emerging markets manager (LSV) slightly lagged MSCI Emerging Markets index by 1.9% over the past year, although it outperformed over two and three years.

#### U.S. Equity

- U.S. equity markets performed extremely well in Canadian dollar terms with a one-year return of 25.9% for the S&P500.
- The Endowment's U.S. equity investments performed well with a return of 26.6%, outperforming the benchmark by 70 basis points.
- While the U.S. large cap manager (Fiduciary) lagged the S&P500 index by 70 basis points, significant value was added versus their respective indexes by the small-(6.5%) and mid-cap (9.5%) portfolios managed by Wedge.

#### Fixed Income

- The Canadian fixed income portfolio is indexed to the FTSE TMX Universe and, as expected, closely matched its return of 6.3%
- The cash return was negative due to losses on internal foreign exchange transactions.
- The Infrastructure portfolio managed by Brookfield outperformed its index by 25.5% in one year. There is a large difference between the gross and net of fees returns due to accounting adjustments that occurred in August 2014.
- Currency hedging, which is implemented for risk control rather than to generate returns, was a drag on performance over the past year as it cost the portfolio 3.2%.
