

Graduate research assistant position

Cereal Science and Technology

Food Science Department, University of Guelph

If you have always been intrigued by the wide range of products that can be made from a simple grain like a wheat kernel or if you want to know more about the 'muscle of flour', this position might just be what you have been looking for!

Description

The successful applicant will be immersed in research focusing on different aspects of protein functionality in a cereal science context. This research will have direct relevance to the texture, quality, shelf life and overall consumer perception of cereal products.

The research group of which he/she will be part is a dynamic, young and ambitious team which is investing in high quality research, intensive training of students and close collaboration with industry and society.

Profile

The successful applicant is a motivated, hard-working, analytical and creative student who wants to embark on a graduate studies adventure and has a strong interest in Cereal Science and Technology.
