The Department of Clinical Studies provides undergraduate and graduate-level training and research in areas related to clinical veterinary medicine including internal medicine, surgery, imaging, anaesthesiology, cardiology, neurology, ophthalmology, oncology, ICU and nutrition. We are dedicated to providing state of the art knowledge in the diagnosis and treatment of companion animals (dogs and cats, as well as birds and exotic species), performance animals (primarily horses) and food-producing animals. We offer advanced clinical training for DVM graduates leading to board certification in specialties listed above.

Programs
Clinical Studies is one of four departments in the Ontario Veterinary College, which, together with the Teaching Hospital, are responsible for delivery of the undergraduate and graduate programs, research, and clinical service. The Department of Clinical Studies maintains an active graduate program, contributing to the Doctor of Veterinary Science, Master of Science, and Graduate Diploma Programs. The Department, in conjunction with the Teaching Hospital, is responsible for the Internship programs.

Faculty and Laboratories
At the present time, there are 38 faculty, 5 staff members, 27 graduate students and 15 interns. The graduate students work in a facility with well-equipped shared laboratories & state-of-the-art equipment such as, CT, MRI, Scintigraphy, Pulmonary Function Test, Dynamic and Static Airway Endoscopy, High Speed Treadmill, Specialized Surgical Suites, etc.

Admission Requirements and Funding
Applicants to the MSc or Diploma program should have at least a ‘B-’ average in a relevant undergraduate degree. A DVM degree is not required for our MSc programs. Applicants to the DVSc program should have at least a ‘B’ average in a DVM degree and internship experience. Prior to applying, students should identify an advisor who will provide funding for a minimum of 2 years for the Master in Science degree. Numerous scholarships and awards are available on a competitive basis.
