

Clinical Studies: GDip., MSc, DVSc

The Department of Clinical Studies offers clinical veterinary medical training and research in internal medicine, surgery, radiology, anaesthesiology, cardiology, neurology, ophthalmology, oncology, emergency, critical care and nutrition. Our state of the art knowledge encompasses the diagnosis and treatment of companion animals (dogs and cats, as well as birds and exotic species), performance animals (primarily horses) and food-producing animals.

Program

We offer two Master's options, a DVSc program, and a Graduate Diploma. Master's students may choose between a course-work plus a major research project/paper MSc, or thesis-based MSc, (approximately six semesters).

The DVSc program requires the completion of residency hours, a qualifying exam and the defense of a research-based thesis. The Graduate Diploma is a three-semester program for veterinarians who wish to up-grade their knowledge.

Funding

Prior to applying, students should identify an advisor who will provide funding for a minimum of 2 years for the Master in Science degree. Numerous scholarships and awards are available on a competitive basis.

Admission Requirements

Applicants to the MSc or Diploma program should have at least a 'B-' average in a relevant undergraduate degree. A DVM degree is not required for our MSc programs. Applicants to the DVSc program should have at least a 'B' average in a DVM degree and internship experience.

Application Deadline:

Ongoing

Entry: Fall

Faculty and Laboratories

At the present time, there are 38 faculty, 5 staff, 27 graduate students and 15 interns. The graduate students work in a facility with well-equipped shared laboratories and state-of-the-art equipment such as: CT, MRI, Scintigraphy, Pulmonary Function Test, Dynamic and Static Airway Endoscopy, High Speed Treadmill, Specialized Surgical Suites, etc.

Faculty Expertise

- Large and Small Animal Surgery
- Large and Small Animal Medicine
- Anaesthesiology
- Cardiology
- Neurology
- Ophthalmology
- Radiology
- Oncology
- Emergency and Critical Care
- Nutrition

ARE YOU INTERESTED IN:

- Clinical Training?
- Specialty Veterinary Medicine?
- Clinical Research?

CAREER OPPORTUNITIES:

- Veterinary Medicine
- Human Medicine
- Biomedical Research
