Guelph’s PhD in Economics program prepares students, who already have a strong background in economics, to become independent and skilled researchers, in preparation for a career in academia, public or private sector. Course offerings cover a broad range of topics in theoretical and applied economics. PhD candidates may write a dissertation in any of the areas of expertise of the graduate faculty in the Department.

Program Features

- Core course work covering PhD-level microeconomics, macroeconomics and econometrics
- Comprehensive examination in economic theory
- Qualifying research paper
- Supervised dissertation

A student enrolled in the PhD in Economics may focus their studies on one of the following fields:

- Econometrics
- Financial Economics
- Resources, Environment and Energy
- Development and Growth
- Applied Microeconomics

Admission Requirements

- A recognized master’s degree in economics with a minimum A- average (80%)
- Background in economic theory and econometrics
