Master of Applied Nutrition: MAN

The Master of Applied Nutrition (MAN) is offered by the Department of Family Relations and Applied Nutrition. We are a unique, interdisciplinary academic unit focused on integrating research and practice. At a time when universities are called to play an ever increasing role in addressing concrete nutritional problems, we pride ourselves in preparing students to work in practical settings with a combination of theory, empirical knowledge and professional skills.

Program

Accredited by the Partnership for Dietetic Education and Practice (PDEP) as a dietetic internship, the MAN program is an intensive 3 semester program of advanced graduate course work, research and dietetic practical experience. The MAN program is designed to meet the professional practice requirements for becoming a Registered Dietitian (RD). Our graduates are able to work in a variety of settings and have a competitive edge in the job market.

The program consists of 3 components:
- Practicum placements
- An applied research project
- Graduate coursework

Admission Requirements

- An undergraduate degree from a dietetic program accredited by PDEP, completed within the last 3 years; OR an undergraduate degree determined to be substantively equivalent by a provincial regulatory body.
- A minimum 75% average in the last 2 years of study
- Grades of at least 75% in applied statistics and social science research methods courses
- MAN students must have access to a car for practicum placements and seminars

Application Deadline:
December 11, 2017

What Our Graduates Say

“The MAN program provided us with the skills to prepare for a new experience, be self-directive, be self-reflective, and develop goals for continual professional development. The program allowed us to practice our presentation and facilitation skills on a regular basis. We were able to improve our confidence in this skill, which is often needed for most dietitian career positions.” - GK, MAN 2014

“I was lucky enough to have a choice between traditional internships and the combined masters practicum. When it came down to making the decision, I knew that the MAN program met all of my goals of gaining the necessary skills of an entry level dietitian as well as advancing my education to further complement my professional skills.” - KR, MAN 2015
