

**Department of Human Health and Nutritional Sciences
University of Guelph**

**FINAL PRESENTATIONS FOR MSc COURSEWORK PROGRAM RESEARCH COURSES
Spring 2018**

Oral Presentations for HHNS*6910, HHNS*6920 & HHNS*6930

Wednesday, August 15th, from 11:55 am – 4:00 pm, ANNU 306

Thursday, August 16th, from 11:55 am – 1:30 pm, ANNU 306

Poster Presentations for HHNS*6930

Thursday, August 16th, from 1:45 – 3:00 pm, 3rd floor ANNU

Course Coordinator: Dr. Amanda Wright (ajwright@uoguelph.ca)

Teaching Assistant: Danyelle Liddle (dliddle@uoguelph.ca)

Course Descriptions from the Course Outlines:

HHNS*6910: Under the supervision of a faculty advisor, students will gain experience in basic aspects of scientific research. This will be accomplished through experience of one or more components of the scientific method in a laboratory setting.

HHNS*6920: Under the supervision of a faculty advisor, students will gain practical experience in discipline-specific aspects of research. This may be accomplished through experience in a pre-arranged practicum in an applied setting; the details of which are to be coordinated by a faculty advisor. If applicable, the faculty advisor will communicate with a practicum advisor regarding organizational issues and the role of the student in the experience.

HHNS*6930: This course will involve participation in active research under the guidance of a faculty advisor. Under the supervision of a faculty advisor and building on knowledge gained from either Basic or Applied Research Techniques and Processes (HHNS*6910 or HHNS*6920), students will carry out a specific research project to its completion. By doing so, this course will expose the student to the entire scientific process.
