

## WE want YOU to be a part of the BIOmarker of Omega-3 IndeX (BIO-OMIX) study!

The BIO-OMIX study is looking at the effects of omega-3 supplements on changes in urinary metabolites!

## **Study Participation involves:**

- Consuming the provided omega-3 fish oil supplements for 8 weeks (~3g/d), followed by an 8-week wash-out period;
- Attend 14 in-person study visits at the Human Nutraceutical Research Unit on campus (<30 min each) in which blood and urine samples will be collected;
- Total time commitment ~7 hrs over a 4-month period.

## **Financial Incentive Provided!**

All participants are entered into a draw to win \$100 (1 in 6 chance!)

Please contact <a href="mailto:bmacino2@uoguelph.ca">bmacino2@uoguelph.ca</a> for more information!

This project has been reviewed by the Research Ethics Board for compliance with federal guidelines for research involving human participants (REB #23-06-011)
