Contractor Safety Management Program

The University is committed to maintaining a safe work and study environment for faculty, staff, students, visitors and contractors. The Contractor Safety Management Program establishes the requirements when contracting for services and projects to allow the University to take all necessary steps to prevent accidents, injuries and illnesses to employees of contractors, its own employees and others. This includes establishing appropriate prequalifying and monitoring procedures for contractors. The program supports the University in meeting the requirements of the Ontario Occupational Health and Safety Act (OHSA) and to meet due diligence standards with respect to selection of contractors and management of contracted work.

The Program and associated documentation [1] for the Contractor Safety Management Program are accessible for users through their University of Guelph login.
