Occupational Health Surveillance

Occupational Health and Wellness provides occupational health surveillance programs. All programs listed below are available for University of Guelph employees and students whose work and/or research activities might expose them to an increased risk of an occupational hazard such as chemicals, physical agents (noise and radiation) and biohazards (including zoonosis) including:

- **Medical Surveillance - Audiometric** [1]
- **Medical Surveillance - Biosafety** [2]
- **Medical Surveillance - Cholinesterase** [3]
- **Medical Surveillance - Diving Operations** [4]
- **Medical Surveillance - Pregnancy Protocol** [5]
- **Medical Surveillance - Rabies** [6]
- **Medical Surveillance - Radiation Lasers** [7]
- **Medical Surveillance - Radiation Radioiodine** [7]
- Vaccination administration available (e.g. Hepatitis, tetanus, diphtheria) based on employee providing vaccine.
- **Employee Risk assessments** [8] are done on all full time employees at the time of hire

For additional information regarding the services listed above or to book an appointment please contact Occupational Health and Wellness at ext. 52647 or at ohw@uoguelph.ca [9]
