Agricultural & Veterinary Safety

Agricultural Safety - Guidance and training is available for agricultural workers and researchers, and those performing similar work, such as landscaping and sports-fields maintenance.

Farm and field cropping equipment presents many hazards. In order to guide supervisors in developing safe work plans specific to agriculture related work, training guidance, SOP templates along with other tools [1] and resources are now available.

Veterinary Safety involves safe work with animals including animal handling and preventing zoonoses.

The University's Manager, Agricultural & Veterinary Safety, M. Christi Cooper may be contacted by email at mcooper@uoguelph.ca [2] or by phone at 519-824-4120 extension 52049.

Review and register for Agricultural & Veterinary Safety Training Courses [3], using the EHS Course Registration System [4].
