

Respiratory Protection

Published on Human Resources (<https://www.uoguelph.ca/hr>)

Respiratory Protection

This course combines classroom-style presentation with practical instruction in the proper selection, use and care of respirators. Elements to be covered are general information on respirator types and applications, advantages and disadvantages of the various respirator types, medical screening for respirator use, donning respirators, respirator use and filter/cartridge change-out, respirator fit testing, and care and maintenance.

Target Audience: Faculty, staff and students who wear or supervise those who wear respiratory protection equipment.
