

Campus Engagement

Through consultation with a broad range of campus stakeholders who have an in-depth understanding of the University's needs, the project team will collect system key requirements on various human resources functional areas. These areas are based on the lifecycle of U of G employees, and include:

- employee master data management
- self-service capability
- recruitment/onboarding
- time management and scheduling
- payroll
- performance management
- compensation
- benefits/pension
- workforce planning
- learning and development
- HR technology landscape

In addition to these stakeholder workshops, we have created a survey to gather faculty and staff feedback on potential self-service features of the new HR system. The survey can be found here: https://uoguelph.eu.qualtrics.com/jfe/form/SV_1GjpiHYqxWa6zw9 [1]. The deadline for completion is May 17, 2019.
