Laboratory Assistant, Chemistry

Agricultural & Food Laboratory, Laboratory Services Division

Temporary full-time from October 2019 to September 2020

Hiring #: 2019-0598

Please read the Application Instructions [1] before applying

Laboratory Services Division (LSD) provides diagnostic and testing services to clients in private industry, government and academic organizations. A diverse service laboratory, LSD consists of two operational units: The Agriculture and Food Laboratory (AFL) and the Animal Health Laboratory (AHL). The Chemistry Unit (AFL) is seeking a laboratory assistant to play a broad supporting role for chromatographic based analysis, as well as other chemistry related testing approaches within the Unit.

Key responsibilities of the Laboratory Assistant:

- Preparing samples for a variety of food and environmental samples (cleaning, chopping, grinding, weighing) and/or sub-sampling;
- Performing a variety of routine extraction and analytical clean up procedures and tests;
- Setting up instrument sequences and performing sample analysis under the guidance of laboratory technicians;
- Entering analytical results into LIMS;
- Preparing reagents and analytical standards;
- Verifying pipettes, thermometers, etc. and maintaining appropriate records for accreditation requirements;
- Discarding samples, solvents and reagents in compliance to health & safety standards and protocols;
- Complying with LSD guidelines and policies including Health and Safety, and Quality Assurance;
- Ensuring laboratory cleanliness and safety.

The Chemistry Unit environment is fast-paced and highly collaborative. Candidates who bring a positive and service-focused attitude, who thrive managing multiple tasks, are highly adaptive and flexible, and enjoy working within a team environment, will be most successful in this role. Minimum requirements also include the following:

- Two year Community College diploma from a Laboratory Technician program in the Chemistry field, combined with relevant laboratory experience, or an equivalent combination of education and experience;
- Demonstrated working experience with a variety of sample preparative techniques, extractions (liquid/liquid, solid phase, reflux and acid digestions) and rapid tests;
- Proven ability to work efficiently and effectively in light of new information, changing situations and different environments;
- Self-motivated, adaptive and able to work collaboratively in a team environment, within tight deadlines and minimal supervision;
- Excellent organizational, interpersonal, and oral/written communication skills;
- Knowledge of Occupational Health and Safety and WHMIS legislation in a laboratory environment;
- Experience working in a GLP accredited laboratory is an asset.
