Analyst II, Web Access Management

Computing and Communications Services (CCS)

Temporary full-time from January 6, 2020 to December 17, 2021

Hiring #: 2019-0619

Please read the Application Instructions [1] before applying

Computing and Communications Services (CCS) is the central IT department at the University of Guelph, providing core IT services and technology solutions to the University community. CCS has a progressive organizational culture, including a strong learning and development focus, and is committed to its Core Values: Service Culture, Integrity, Individual Leadership, Teamwork, Agility, and Communication.

One of the important functions of the CCS Information Security team is providing access management services for web-based applications used by the entire University of Guelph community. Web access management is a critical component of our infrastructure and provides authentication and authorization services to many of the critical applications used on campus, including the University website, email, learning management, and several enterprise applications.

Reporting to the Chief Information Security Officer, the successful candidate will support and advance web access management services at the University of Guelph. Maintaining service levels, integrating new services, and evolving the access management infrastructure are core components of this role. The role also includes providing technical support and guidance to a wide range of campus community representatives including CCS, faculty, staff, students, and distributed IT staff on campus.

Responsibilities of this position include:

- Working collaboratively with other CCS teams, other organizational units on campus, and 3rd party/cloud service providers to integrate their services into the University’s web access management platform.
- Providing technical support for web access management services and providing excellent customer service to our clients across campus.
- Investigating, troubleshooting, tracking, and resolving access management related issues.
- Following proper change management processes to keep Linux and Windows servers and applications updated and secure.
- Developing tools, writing scripts, and automating processes to assist with routine tasks, most commonly in Java, Bash, and PowerShell.
- Participating in a variety of projects related to our access management tools, technology, and processes.
- Enhancing, streamlining, and improving technology and processes in order for the team to be more effective and efficient.

Requirements of the position include:

- Bachelor’s degree in Computer Science, Software Engineering, or Information Technology, and a minimum of two years of related work experience.
- Hands-on technical experience supporting web servers and Java application servers, preferably WebLogic.
Tomcat, Apache, and IIS, including configuration, troubleshooting, and on-going performance monitoring
- Scripting skills in Bash, Python, PHP, and/or PowerShell
- Application development experience in Java or a related platform
- Systems administration experience on Linux and Windows operating systems
- Strong analytical, interpersonal, technical writing, and communication skills with ability to work effectively with non-technical business clients, technical team members, and third-party support
- Understanding of IT security best practices
- Ability to balance the competing demands of multiple projects and operational requirements
- Ability to work individually and as an integral member of a high-performance team

The following skills and experiences will set a candidate apart:

- Experience in web application design and understanding of the HTTP protocol
- Previous experience supporting directory services, such as LDAP and Active Directory
- Hands-on technical experience with web access management and identity federation solutions, such as Oracle Access Manager and Shibboleth
- Familiarity with protocols such as SAML and REST
- Administration of Oracle databases or other relational databases
- Relevant technical certifications, including those with identity and access management solutions
- Previous experience in higher education with demonstrated collaboration, communication and time management skills

Classification: P03
Professional/Managerial Salary Bands: [2]

At the University of Guelph, fostering a culture of inclusion [3] is an institutional imperative. The University invites and encourages applications from all qualified individuals, including from groups that are traditionally underrepresented in employment, who may contribute to further diversification of our Institution.
