Phone: 519-824-4120 x53774

Radiation Safety programs educate staff, faculty and students on managing contact with radiation. This can mean anything from laser light, to X-ray, to emissions from specialty microwave heaters, to subatomic particles from radioactive materials.

Radiation Safety Guidelines and Forms

Policies, Procedures and Forms now on Courselink

Current procedures, guidelines and forms associated with the radiation safety program have now been put on Courselink under a course named "Radiation Protection Program" in the "Resources" section. Permit Holders and Users have been granted access to the "course".

Additional personnel who may require access to this information can register through the EHS registration system for the course entitled "Radiation Protection Program". Please register at ehs course registration [3] with your Central Login and Password

Radiation Safety and Related Committees

Radiation Safety Committee Membership (January, 2015)

Bill Teesdale (chair) - Physics
Marica Bakovic - Human Health and Nutritional Sciences
Domenico Barillari - Environmental Health and Safety
Heather Chalmers - Clinical Studies
Ralf Gellert - Physics
Ryan Das - Environmental Health and Safety
Valerie Poirier - Clinical Studies
Jennifer Wesley - Office of Research Services
Sarah Wooten - Pathobiology

© 2016 University of Guelph
Accelerator Management Committee Membership (May, 2013)

David Atkinson - Physics
Domenico Barillari - Environmental Health and Safety
Iain Cambell - Physics
Ralf Gellert - Physics
Christopher Heirwegh - Physics
Bill Teesdale - Physics
