

Principal Investigator:

1. Material:

2. Source:

3. List of potential Infectious agent that may be present (*Use ePATHogen database to know human and/or animal risk groups*):

Microorganisms	Human Risk group	Animal Risk group

4. Usual volume used is:

Largest volume used

5. Is the material inoculated in animals?  Yes  No *If yes, complete Form BSC-7.*7. References. *Attach any references that may support the list of potential infectious agents that may be present in animal source material.*
