CAS #	Active	All ▾	

The following is the recommended order for searching the catalogue for chemicals:

1. Product Number/Stock Number
2. CAS #
3. Chemical Name + Vendor

Cheat Sheet for determining the product number of chemicals from different vendors:

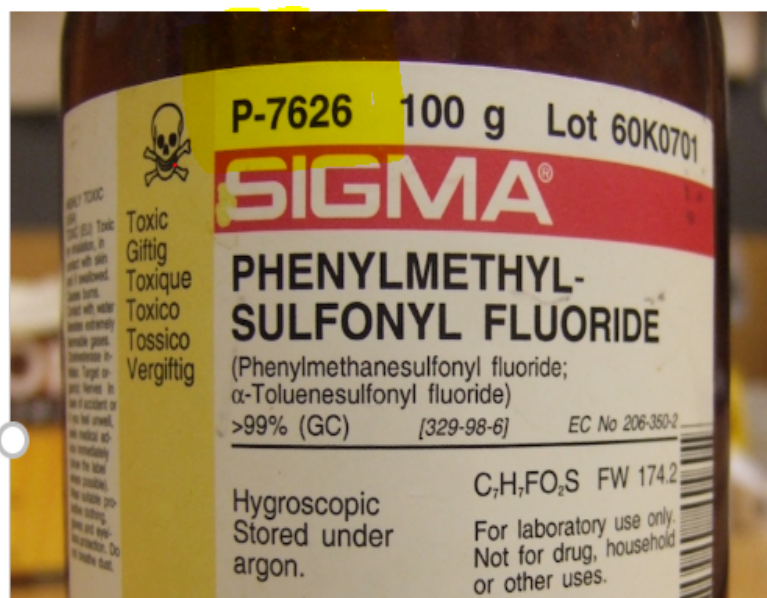

Product Number highlighted in Yellow

1. Sigma-Aldrich

The product number for this chemical is 247588

2. Sigma

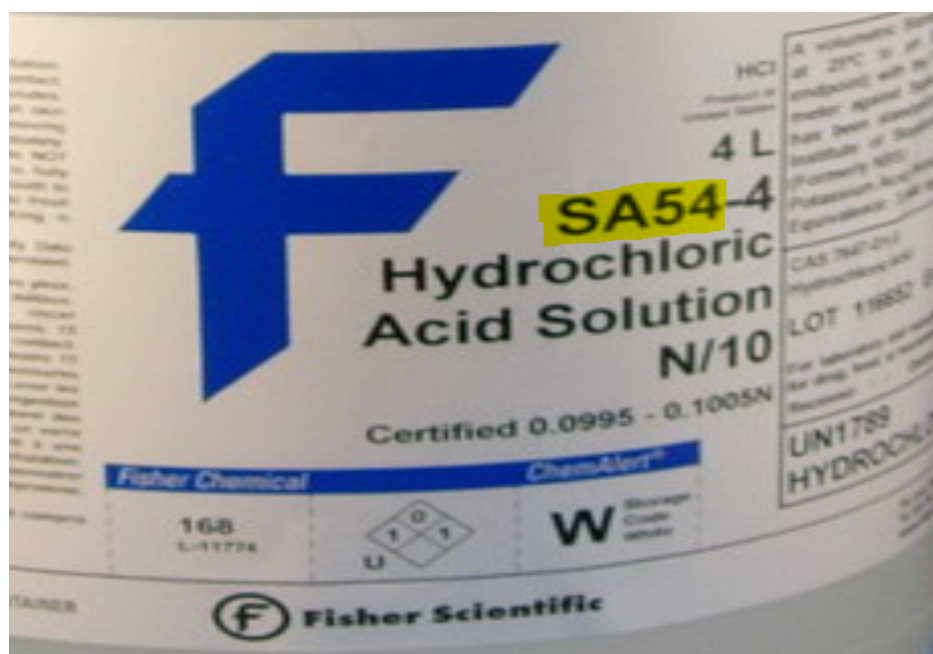

The product number for this chemical is P7626 or P-7626 (Both will work)

3. Fluka

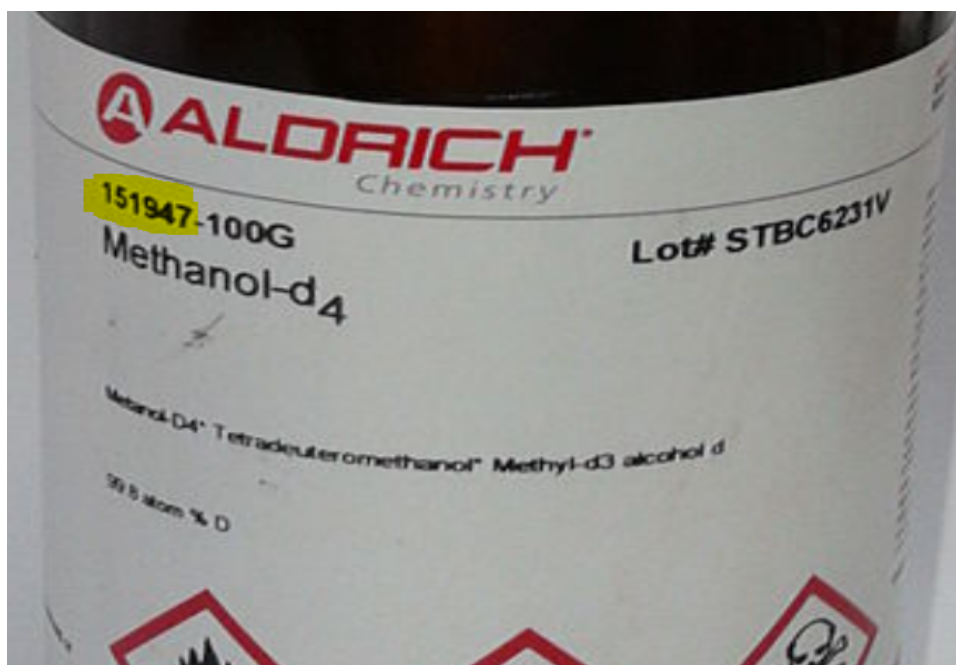

The product number for this chemical is 04290

4. Fisher Scientific

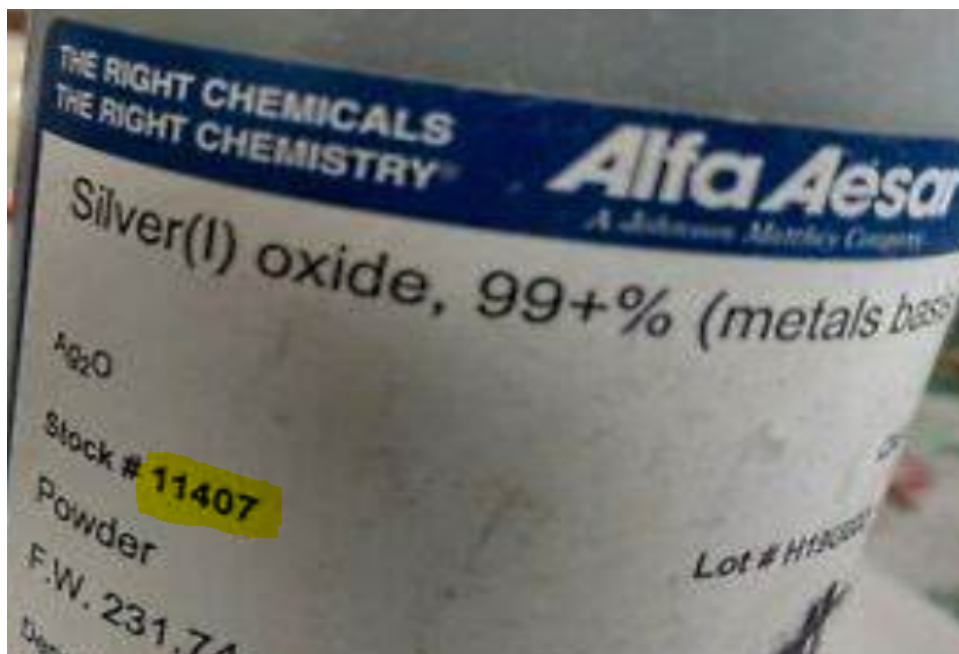

The product number for this chemical is SA54

5. Aldrich

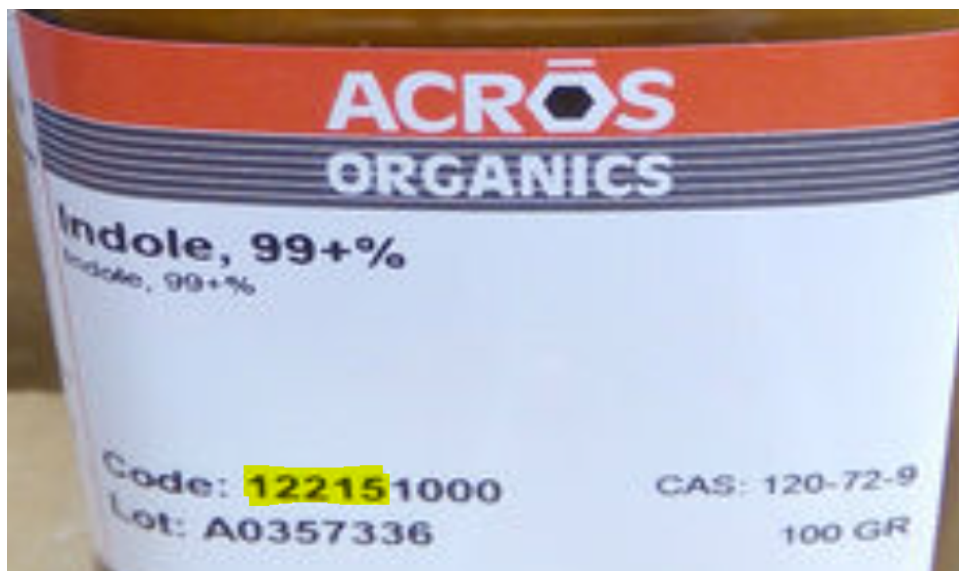

The product number for this chemical is 151947

6. Alfa Aesar

The product number for this chemical is 11407

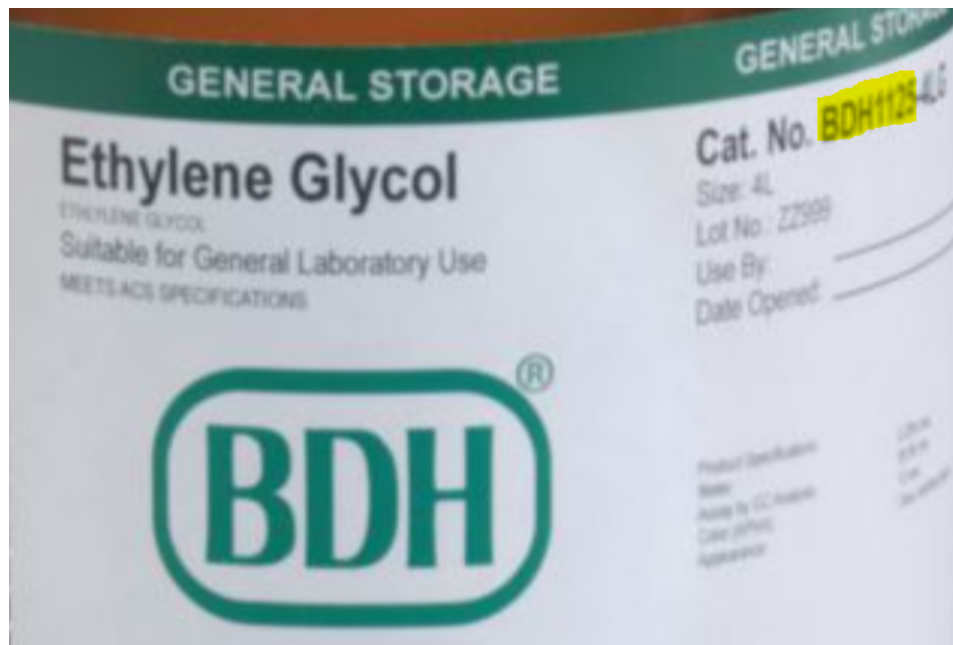

7. Acros Organics

The product number for this chemical is 12215 (First 5 Digits)

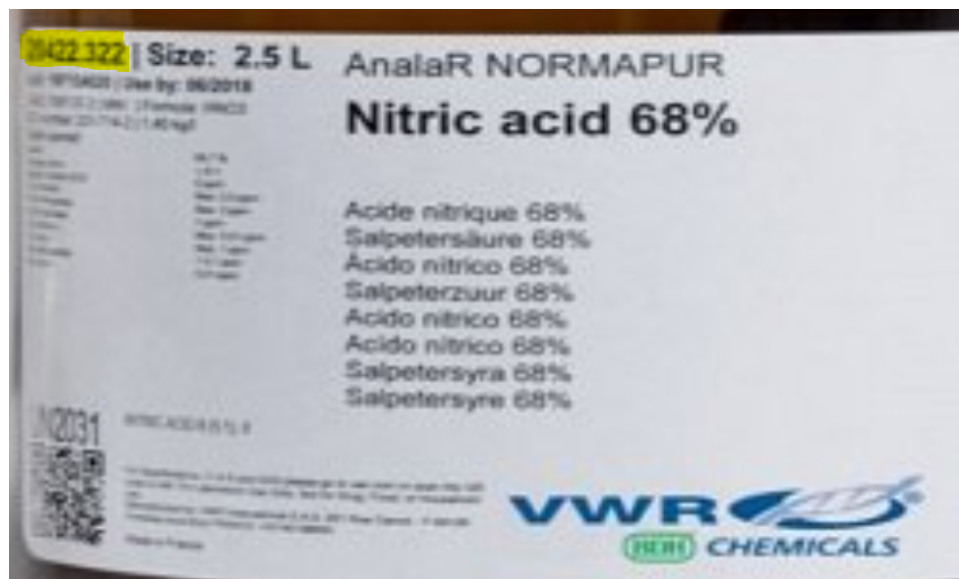

The rest of the digits represent the amount of substance in the container (100g)

8. BDH

The product number for this chemical is BDH1125

9. VWR

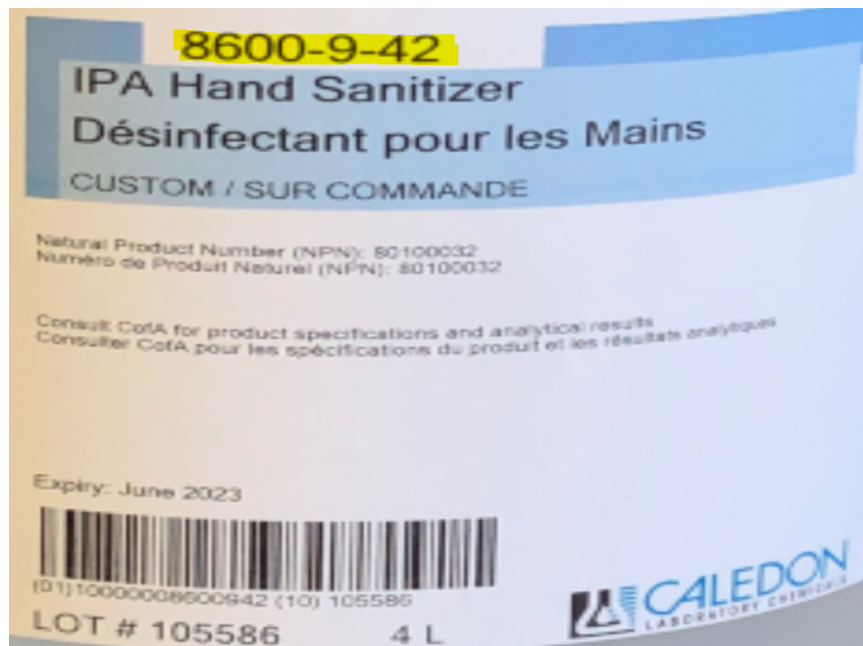

The product number for this chemical is 25422322

10. EMD Millipore

The product number for this chemical is 1.12298.1001

11. Caledon Laboratories

The product number for this chemical is 8600-9-42

12. Linde/Praxair (For gas cylinder barcoding)

The product number for this chemical is GP-520082A

Or

You can search "Compressed, Helium" in the name category
