American National Standards Institute (ANSI) Standard Z358.1-2014 "Emergency Eyewash and Shower Equipment" recommends that eyewash stations be flushed on a weekly basis.

Date	Initial	Date	Initial	Date	Initial

Communication:

- Eye wash stations are required to be flushed weekly.
- Print. Post. Initialed by someone once a week.
- OHSA Act follows the ANSI Z358.1-2014 Reg.
- The PI or designate of the lab is responsible under the Act.
- While flushing is recommended for 3-5 minutes, 5-10 seconds would certainly be enough to clean out the nozzles.
- Please ensure you have a floor drain! (or a bucket if no drain)
