

BINF*6110 Genomic Methods for Bioinformatics

Winter 2020

Section(s): C01

College of Biological Science

Credit Weight: 0.50

Version 1.00 - December 18, 2019

1 Course Details

1.1 Calendar Description

This course provides an introduction to current and emerging methods used to generate genomic data analyzed in bioinformatics. This may include techniques for DNA sequencing as well as transcriptome, proteome and metabolome analysis. The objective is to develop an appreciation for the challenges of producing data.

Restrictions: Restricted to students in Bioinformatics programs. Students in other programs may consult with course instructor.

1.2 Course Description

Genomic Methods for Bioinformatics (BINF*6110, winter 2020) will focus on the analysis of high-throughput sequence data that students can expect to encounter in current bioinformatics applications. We will focus on four topics: 1) types of genomic data and their application domains; 2) alignment and assembly, including choice of reference genome; 3) detection and filtering of genetic variants; 4) common genetic analyses based on these variants. This course will involve hands-on exercises in a high performance Unix computing environment, as well as analysis and data visualization in R; previous experience in both Unix and R is strongly recommended.

1.3 Timetable

Dates: Jan. 7-April 2, 2020

Time: Tuesday/Thursday 11:30-12:50

Location: SSC 1306

1.4 Final Exam

There will not be a final exam for this course.

2 Instructional Support

2.1 Instructional Support Team

Instructor: Elizabeth Mandeville
Email: emandevi@uoguelph.ca
Telephone: +1-519-824-4120 x52843
Office: SSC 1454
Office Hours: I will be available for student support outside of class 1:30-2:30 PM each Tuesday (feel free to drop in during this time without an appointment), or by appointment. If scheduling an appointment outside of set office hours, please email me at least 24 hours in advance of when you would like to meet, with a brief description of why you would like to meet.

Email policy: I will respond to your emails as quickly as I am able within working hours (weekdays 8:30-4:30 PM). You are welcome to email me at any time, but please be aware that if you email me in the evening or on weekends, I will likely be unable to respond until working hours.

2.2 Teaching Assistants

Teaching Assistant: Haiyang Chang
Email: hchang02@uoguelph.ca
Office Hours: By appointment; please email Haiyang to request assistance.

3 Learning Resources

In this course we will rely on a variety of resources, including online tutorials, software documentation, and the primary literature. Readings and links will be posted to the course website as they are assigned.

3.1 Recommended Resources

Bioinformatics Data Skills (Textbook)

<https://ebookcentral.proquest.com/lib/uoguelph/detail.action?docID=3564550>

We will use *Bioinformatics Data Skills* by Vince Buffalo as a reference for some of the course. Note that this book is available as an electronic resource from the University of Guelph library, so you do not need to purchase a paper copy unless you prefer that format. Note that this book is from 2015, which is a long time ago in bioinformatics (sequencing and analysis change fast), but it is still relevant even if some syntax has changed.

4 Learning Outcomes

4.1 Course Learning Outcomes

By the end of this course, you should be able to:

1. Describe currently available types of genomic data, and identify suitable applications and limitations
 2. Choose suitable genomic resources and software for bioinformatics analyses
 3. Work effectively in a Unix high-performance computing environment
 4. Communicate the results of bioinformatic analyses in written, oral, and visual format
-

5 Teaching and Learning Activities

This class will be a mixture of mini-lectures where I review content, and working sessions where students apply new concepts to the analysis of actual data. All students will need to sign up for an account on Compute Canada systems; we will be working on an HPC (high performance computing) cluster for the majority of exercises in this class. Note that the HPC systems we will use have remote access through Unix SSH, so you will be able to access these systems through your laptop or lab computers - no special hardware needed. If you intend to use your own laptop, you must install a Unix/Linux Client on your laptop (e.g. PuTTY). Additionally, all students are expected to have R installed on their laptops.

We will focus on four topics during this course: 1) Types of genomic data and their uses; 2) Genome assembly and alignment of sequence data to a reference; 3) Genetic variant identification and filtering; 4) Common analyses applied to genomic data.

6 Assessments

This course will be project-based, and will feature four major assignments (akin to problem sets or lab reports), each worth 20% of your grade for the course. Assignments will correspond to the four major sections of the course; more detailed instructions will be provided at least 2 weeks prior to the due date. Each assignment will involve a combination of written report, code, and figures.

We will also have a number of smaller assignments due in weeks when no larger assignment is due, which will be graded for completion, not for accuracy. Note that these small assignments are intended to check your progress; they are also a tool for the instructor to

understand which topics might need more attention. These assignments will cumulatively be worth 20% of your grade.

6.1 Assessment Details

Assignment 1: Due by 4 PM Friday, January 31, 2020 (20%)

Assignment 2: Due by 4 PM Friday, February 14 (20%)

Assignment 3: Due by 4 PM Friday, March 13 (20%)

Assignment 4: Due by 4 PM Friday, April 3 (20%)

Small completion assignments (20%)

Due weekly on Thursdays (by 4 PM) in weeks with no larger assignment. More information will be given in the week before each small assignment is due. Note that these assignments are graded only for completion, and are meant to serve as a check-in between instructor and students.

7 Course Statements

7.1 Attendance

Attendance at class sessions is required for this course. There is a strong hands-on component to this class that can not easily be replaced outside of regular class sessions. (However, please see below for University policies for approved absences.)

7.2 Collaboration and group work

Assignments for this course are individual, but students may confer and seek help from one another to complete assignments. I encourage you to learn from one another as you work through new types of analyses. However, note that all code, text, and figures must be the individual work of the student submitting it, and that duplicate submissions (including identical code for reasonably complex tasks) will be treated as plagiarism and a violation of Academic Integrity standards (please see below).

7.3 Due dates

Assignments are due by the dates listed in the Course Outline. Late submissions will be marked down 10% for each day that they are late. If you are ill or cannot complete your assignments on time for a University-sanctioned reason (see below), please contact the instructor as soon as possible.

8 College of Biological Science Statements

8.1 Wellness

If you are struggling with personal or health issues:

- Counselling Services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance.
- Student Health Services is located on campus and is available to provide medical attention.
- For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations.
<http://www.selfregulationskills.ca/>

9 University Statements

9.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

9.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Graduate Calendar - Grounds for Academic Consideration

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

Associate Diploma Calendar - Academic Consideration, Appeals and Petitions

<https://www.uoguelph.ca/registrar/calendars/diploma/current/index.shtml>

9.3 Drop Date

Students will have until the last day of classes to drop courses without academic penalty. The deadline to drop two-semester courses will be the last day of classes in the second semester. This applies to all students (undergraduate, graduate and diploma) except for Doctor of Veterinary Medicine and Associate Diploma in Veterinary Technology (conventional and alternative delivery) students. The regulations and procedures for course registration are available in their respective Academic Calendars.

Undergraduate Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Graduate Calendar - Registration Changes

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-reg->

regchg.shtml

Associate Diploma Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/diploma/current/c08/c08-drop.shtml>

9.4 Copies of Out-of-class Assignments

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance and not later than the 40th Class Day.

For Guelph students, information can be found on the SAS website

<https://www.uoguelph.ca/sas>

For Ridgetown students, information can be found on the Ridgetown SAS website

<https://www.ridgetownc.com/services/accessibilityservices.cfm>

9.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community—faculty, staff, and students—to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct

9.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

9.8 Resources

The Academic Calendars are the source of information about the University of Guelph's procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.
