

BIOL*2060 Ecology

Winter 2019

Section(s): C01

Department of Integrative Biology

Credit Weight: 0.50

Version 1.00 - December 12, 2018

1 Course Details

1.1 Calendar Description

This course discusses the ecology of plants, animals, fungi and bacteria as individual organisms, interacting populations, communities and ecosystems. Lectures and discussion groups are used to demonstrate the difficulty of interpreting ecological data derived from field studies. The value of laboratory-based research in ecology will also be discussed. The course will be important for anyone who wishes to understand what we know and need to know about the way ecological systems work.

Pre-Requisite(s): 4.00 credits including BIOL*1070

1.2 Course Description

BIOL*2060 will introduce you to the basic concepts, theories and evidence about ecological processes that determine the distribution and abundance of organisms. Our approach will include a mix of theory and field and laboratory techniques as presented in lecture and discussed in tutorials. We will also take time during lectures to apply the principles you've been learning to topics related to conservation, resource use, and human impacts on the biosphere. Discussions during lectures and tutorials and written assignments will allow you to practice working with the scientific method.

1.3 Timetable

- Lectures: Tuesday/Thursday, 11:30-12:50 in MACN 105
- Tutorials:
 - Tuesday: 1:00, 2:00, 3:00
 - Wednesday: 11:30, 12:30, 1:30
 - All tutorials will be held in SCIE 3315

1.4 Final Exam

Exam time and location is subject to change. Please see WebAdvisor for the latest information.

2 Instructional Support

2.1 Instructional Support Team

Instructor:	Cortland Griswold
Email:	cgriswol@uoguelph.ca
Telephone:	+1-519-824-4120 x56240
Office:	SC1 1474
Course Co-ordinator:	Shaylah Tuttle-Raycraft
Email:	stuttle@uoguelph.ca
Telephone:	+1-519-824-4120 x58096
Office:	SSC 2502

3 Learning Resources

3.1 Required Resource(s)

SimUText Ecology Electronic 'Textbook' Software (Textbook)

We will be using interactive software called SimUText Ecology for BIOL*2060. This software is required, but is much less expensive than a traditional textbook, and is yours to keep for life. SimUText Ecology must be purchased with a credit card and can be downloaded onto your computer. It utilizes text, videos, and interactive simulations to allow you to practice working with concepts we discuss in lecture. Information will be provided about purchasing the textbook.

Spreadsheet and Word Processing Software (Software)

The assignments will involve creating effective figures and writing reports. You will need access to spreadsheet and word processing software that is compatible with Microsoft Word and Excel. These programs are available to download for free from the Computing and Communication Services (CCS) website. They are also installed on the laptops available at the University of Guelph Library and on the desktops in the CBS computer laboratories.

Student Engagement System (Equipment)

To facilitate interactions and discussions in and out of lecture, we will be using a student engagement system such as Top Hat or iClicker. Once we finalize a decision on a single student engagement system we will update this course outline. Either software platform allows you to answer questions from your smartphone, tablet, or laptop.

3.2 Submission of Assignments Checklist

- Have I got a back-up copy of my assignment saved on a USB key or in the cloud?
 - Is my work complete?
 - Have all required elements been included?
 - Have I used the appropriate Submission Form? (No cover page is required.)
 - Have I saved my file in Word (.doc file format compatibility mode)?
 - Have I named my file with my surname, given name, and assignment number, e.g. "Rye Leslie Assignment 1.doc"?
 - Have I submitted my file in the correct folder on the Dropbox page?
 - Have I submitted the correct file? **Hint:** You can download the file after it has been submitted to double-check for empty files, incomplete files, or incorrect files.
 - Have I submitted it well in advance of the deadline to avoid late penalties? **Hint:** If you are still working on the assignment close to the deadline, you should submit one copy before and then re-submit closer to the deadline. We will grade the version that is submitted closest to the deadline.
 - Have I received a Dropbox Submission Receipt by email? **Note:** You should retain this email in case it is needed to verify that your submission was received. If you don't get a Submission Receipt then your submission has not been successful and you should try again.
-

4 Learning Outcomes

4.1 Course Learning Outcomes

By the end of this course, you should be able to:

1. Explain patterns observed in nature by applying fundamental ecological theories.
2. Communicate clearly about ecological systems and processes by applying appropriate ecological terminology.
3. Appreciate the historical development of the discipline and the contributions of influential scientists to our understanding of contemporary ecological issues.
4. Begin to formulate solutions to conservation and management issues related to the distribution and abundance of species by applying ecological theory.
5. Navigate spreadsheets, construct appropriate graphs, and interpret results through class discussions and tutorial group work.
6. Find electronically, read for comprehension, and critically analyze primary scientific

- papers on a specific ecological topic.
7. Critically evaluate primary ecological literature and interpret case studies in the context of ecological theory.
 8. Develop and present a research proposal (including a review of literature, statement of hypothesis and predictions, appropriate research methodology, and anticipated results) on an ecological topic.
-

5 Teaching and Learning Activities

5.1 Lecture

Topic(s): Lectures will cover all general topics in Ecology
Please check course website for PDF of lecture schedule.

5.2 Lab

Topic(s): Reading scientific journal articles

Topic(s): Writing a research question

Topic(s): Finding relevant journal articles

Topic(s): Critically analyzing journal articles

Topic(s): Principles of experimental design

Topic(s): Creating effective figures

Topic(s): Research question to experimental design

Topic(s): Expected results and significance

Topic(s): Assignment 2 Help Session

5.3 Course Content

There are five major sections in the course:

- Section I: What is Ecology?
- Section II: Effect of the Abiotic Environment on the Distribution of Organisms
 - Including climate, biogeography, and adaptation to environmental extremes
- Section III: Effect of the Biotic and Abiotic Environment on the Abundance of Organisms
 - Including behaviour, demography, life history, and population growth
- Section IV: Effect of Species Interactions on the Distribution and Abundance of Organisms
 - Including competition and predation
- Section V: Determinants of Community Structure and Function
 - Including succession, top-down vs. bottom-up regulation, and keystone species

5.4 General Information on Lectures

- The assigned readings should be completed PRIOR to each lecture. This will allow us to spend our lecture time clarifying, extending, and applying the concepts from the assigned reading.
- For your convenience, drafts of slides will be posted on Courselink prior to lecture. However, please note that these drafts can differ from the final, corrected versions of the slides, which will be posted on Courselink after lecture if substantial changes are made.
- We will often ask you to confer with your neighbors during lecture. We do this because research shows that students who work with their neighbors to answer questions in class score better on exams than students who do not interact with their peers.

5.5 General Information on Tutorials

- Each student will be assigned to a tutorial group and will remain with that group for the semester.
- There will be nine tutorials during the semester, and you are expected to attend them all. Each tutorial will include some or all of the following activities: i) advance preparation on an individual basis, ii) a small group discussion to answer a series of questions on a worksheet, and iii) submission of the completed worksheet(s).

- Materials for each tutorial session will be available on CourseLink. Be sure to complete any assigned activities in advance of the tutorial so that you are prepared and ready to contribute to your group!

5.6 Assigned SimUText Chapters

Sections of seven SimUText Ecology chapters are assigned:

- Section II:
 - Biogeography
 - Physiological Ecology
- Section III:
 - Behavioural Ecology
 - Life History
 - Population Growth
- Section IV:
 - Competition
 - Predation, Herbivory and Parasitism
- Section V:
 - Community Dynamics

At the end of each SimUText section, you will have the option to submit your responses to questions. The answers to these questions will be released to provide you with feedback on your comprehension of course material, but they will not be used to calculate your grade for the course.

***You will receive an email with instructions for purchasing SimUText. The instructions will also be posted on the Biol 2060 CourseLink site. ***

6 Assessments

6.1 Assessment Details

Pre-Tutorial Worksheets (4%)

Date: Weekly

- Weekly tutorials will take you through the skills needed to complete the two assignments.
- Pre-Tutorial Worksheets (8 total) will be completed on an individual basis in advance of the tutorial, and they will be submitted individually. These

worksheets will each be worth 0.5% of your grade for the semester.

- Questions about tutorial grades must be emailed to Course Coordinator.

Tutorial Worksheets (6%)

Date: Weekly

Learning Outcome(s): 5,6,7

- Group Worksheets will be completed during the tutorial, and one will be handed in for each group. The best 6 out of 8 total worksheets will each be worth 1% of your grade for the semester. The lowest 2 worksheets will be dropped.
- Questions about tutorial grades must be emailed to Course Coordinator.

Assignment 1 (10%)

Due: Mon, Feb 4, 11:59 PM

Learning Outcome(s): 6,7

The assignment will allow you to explore how science is done, including searching for primary research journal articles using online databases, and summarizing and critically evaluating journal articles in a literature review.

Midterm Exam (25%)

Date: Thu, Feb 28

Learning Outcome(s): 1,2,3,4,5,7

The exam will include a selection of questions based on all material presented and discussed in lectures, tutorials, assignments, and the assigned portions of the SimUText Ecology chapters. The emphasis of these questions is on comprehension and application of knowledge, not regurgitation of memorized facts. The questions discussed in lecture will be similar to the kinds of questions that will appear on exams.

Assignment 2 (20%)

Due: Mon, Mar 25, 11:59 PM

Learning Outcome(s): 1,2,6,7,8

The assignment will continue to allow you to explore how science is done, including searching for primary research journal articles using online databases, identifying gaps in the knowledge, and writing a research proposal.

Final Exam (35%)

Date: See Webadvisor, See Webadvisor

Learning Outcome(s): 1,2,3,4,5,7

The exam is comprehensive and will include a selection of questions based on all material presented and discussed in lectures, tutorials, assignments, and the assigned portions of the SimUText Ecology chapters. The emphasis of these questions is on comprehension and application of knowledge, not regurgitation of memorized facts. The questions discussed in lecture will be similar to the kinds of questions that will appear on exams.

7 Course Statements

7.1 Academic Consideration

- If you are unable to complete any of the Writing Assignments by the deadline for documented medical, psychological, or compassionate reasons, please contact the Course Coordinator in advance of the deadline to make arrangements for a short extension.
- If you are sick or otherwise unable to attend a tutorial for a valid medical, psychological or compassionate reason, please contact the Course Coordinator by email in advance. You may be able to attend a different tutorial section that week or complete the work on an individual basis. If so, be sure to add your regular tutorial day and time beside your name on the Tutorial Worksheet so that you can get credit for your work.
- If you are absent for a midterm exam for documented medical, psychological, or compassionate reasons, you should contact your program counsellor within five working days of the missed exam and seek academic consideration. Students who miss a midterm exam for documented reasons will have the final exam reweighted.
- See the undergraduate calendar for information on regulations and procedures for Academic Consideration:
<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

7.2 Academic Integrity

- You are encouraged to discuss the course with your peers, but all work for the Writing Assignments MUST be your own.
- The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community – faculty, staff, and students – to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

- Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.
- The Academic Misconduct Policy is detailed in the Undergraduate Calendar: <http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

7.3 Plagiarism detection software

Electronically submitted student assignments are automatically compared to other electronic documents (including online and student papers) by Turnitin™ for degree of similarity.

7.4 Asking Questions in the Online Discussions

If you have any questions about the course you should post them in one of the discussions on the Courselink website. The Instructor(s) will answer questions about lectures in the Main Class Discussion, and the Course Coordinator will answer questions about tutorials and writing assignments in the Tutorials and Assignments Discussion. Questions of a personal nature (e.g. illness) should be emailed to the appropriate person, i.e. an Instructor regarding lectures and exams, and the Course Coordinator regarding tutorials and assignments.

7.5 Assignment of Grades

Assignments will be marked on the basis of the criteria outlined in the Undergraduate Calendar. Clarification about the assignment of grades can be found under Grading Procedures at: <http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-grds-proc.shtml>

7.6 Course Evaluation Information

- CCS now provides the U of G Course Evaluation System in a secure, online environment. End of semester course and instructor evaluations provide students the opportunity to have their comments and opinions form part of the information used by Promotion and Tenure Committees in evaluating the faculty member's contributions in the area of teaching.
- Course evaluations are now conducted through this web site. Login with your central email account login ID and password: https://courseeval.uoguelph.ca/CEVAL_LOGIN.php
- Instructors do NOT receive evaluations until the end of exam period. Furthermore, evaluations are anonymous, unless you specifically indicate you want to acknowledge your comments.

7.7 Re-Grading of Assignments

If you wish to have an assignment re-graded, then you should email the Course Coordinator. In order for a re-grading request to be considered you must provide a justification for why the grade should be changed based on the assessment criteria found in the grading rubric. All requests for re-grading **MUST** be made within one week of the return of the assignment. Be aware that the entire document will be re-graded, which could result in an increase, decrease, or no change to your mark.

7.8 Student Responsibilities

You should plan on spending a minimum of ten hours per week working on this course, in addition to time spent in lectures and tutorials. This time includes reading the required sections of the electronic textbook, reviewing and/or rewriting lecture notes, preparing questions on any material with which you need help, preparing for the tutorials, and working on your writing assignments. The Instructor, Course Coordinator, and TAs will offer as much assistance as possible. However, remember that this is your learning experience, and you will get as much out of this class as you put into it.

7.9 Submission of Assignments and Late Policies

- Pre-tutorial worksheets must be submitted in the correct folder on the Dropbox page in D2L before the start of your tutorial session. Late submissions will **NOT** be accepted.
- Group worksheets must be submitted in person at the end of the seminar. You must be present when the worksheet is handed in to receive credit. Late submissions will **NOT** be accepted.
- The two Writing Assignments should be saved in Word (.doc file format compatibility mode) and submitted electronically in the correct folder on the Dropbox page in D2L by the due date and time. Late submissions will be accepted for up to 24 hours after the assignment deadline with a 10% late penalty. If you encounter technical problems when submitting your writing assignments, please email the assignment to the Course Coordinator in advance of the deadline to avoid late penalties.
- Please be sure to follow the guidelines in the Submission of Assignments Checklist in order to avoid common problems that could cost you marks.

8 Department of Integrative Biology Statements

8.1 Academic Advisors

If you are concerned about any aspect of your academic program:

- Make an appointment with a program counsellor in your degree program. [B.Sc. Academic Advising](#) or [Program Counsellors](#)

8.2 Academic Support

If you are struggling to succeed academically:

- Learning Commons: There are numerous academic resources offered by the Learning Commons including, Supported Learning Groups for a variety of courses, workshops related to time management, taking multiple choice exams, and general study skills. You can also set up individualized appointments with a learning specialist. <http://www.learningcommons.uoguelph.ca/>
- Science Commons: Located in the library, the Science Commons provides support for physics, mathematic/statistics, and chemistry. Details on their hours of operations can be found at: <http://www.lib.uoguelph.ca/get-assistance/studying/chemistry-physics-help> and <http://www.lib.uoguelph.ca/get-assistance/studying/math-stats-help>

8.3 Wellness

If you are struggling with personal or health issues:

- Counselling services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance. <https://www.uoguelph.ca/counselling/>
- Student Health Services is located on campus and is available to provide medical attention. <https://www.uoguelph.ca/studenthealthservices/clinic>
- For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations. <http://www.uoguelph.ca/~ksomers/>

9 University Statements

9.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

9.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The regulations and procedures for [Academic Consideration](#) are detailed in the Undergraduate Calendar.

9.3 Drop Date

Courses that are one semester long must be dropped by the end of the fortieth class day; two-semester courses must be dropped by the last day of the add period in the second semester. The regulations and procedures for [Dropping Courses](#) are available in the Undergraduate Calendar.

9.4 Copies of Out-of-class Assignments

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required, however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance, and not later than the 40th Class Day.

More information: www.uoguelph.ca/sas

9.6 Academic Misconduct

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community – faculty, staff, and students – to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The [Academic Misconduct Policy](#) is detailed in the Undergraduate Calendar.

9.7 Recording of Materials

Presentations which are made in relation to course work—including lectures—cannot be recorded or copied without the permission of the presenter, whether the instructor, a classmate or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

9.8 Resources

The [Academic Calendars](#) are the source of information about the University of Guelph's procedures, policies and regulations which apply to undergraduate, graduate and diploma programs.
