

Field Biology (BIOL*4410) 2021: Section 01

We are delighted to announce:

Field Biology BIOL*4410 (0.75 credit) will be offered in remote format in summer-fall 2021.

Section 01 investigates plant, invertebrate, and vertebrate terrestrial biodiversity; section 02 focuses on biodiversity and watershed management. Both sections include an integrative research project.

Are you interested in:

Appreciating nature and spending time outdoors in your local region, all while earning course credit?

Contemporary environmental issues and contributing to society?

Learning applied skills in identifying and observing plants and animal wildlife?

Communicating ideas and developing your skills in graphics, writing, and speaking?

Measuring and comparing biodiversity across sites and time?

Collaborating and sharing ideas with others?

Testing ecological interactions and conducting integrative research?

Preparing for graduate studies and your future career?

Then this is the course for you! Apply today!

Read about the course details here:
https://www.uoguelph.ca/ib/field_courses

Complete the online application form for one or both sections (students will only be admitted to one).

Let's start observing and learning together.
