

BIOL*4700, 4800 and/or 4900 The Ontario Universities Program in Field Biology (OUPFB)

The Ontario Universities Program in Field Biology (OUPFB) is the brainchild of the Biology Departments of Ontario Universities and provides a method to pool field course resources. Since field courses are expensive to offer and are very faculty and staff intensive, the Ontario Universities Biology Departments decided to pool resources in this area. The net outcome is that students can take Field Courses offered by other member institutions. This provides a tremendous array of choices that no one department would ever be able to offer. A list of the available courses is posted at <http://www.oupfb.ca>. For registration, Guelph students would be registered in BIOL*4700, BIOL*4800 and/or BIOL*4900 Field Biology for two-week or longer courses which are worth 0.50 credit. Again, you must be pre-registered for the course before you leave, so please check and confirm. Students taking field courses outside of Canada must also take a pre-departure orientation session through the Centre for International Programs, called [Depart Smart](#).
