

# IBIO\*4500 Research in Integrative Biology I

Winter 2020

Section(s): C01

Department of Integrative Biology

Credit Weight: 1.00

Version 1.00 - November 01, 2019

---

## 1 Course Details

### 1.1 Calendar Description

The student will undertake an independent research project of a practical or theoretical nature that relates either to organismal biology or the teaching of organismal biology and is conducted under the supervision of a faculty member. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the semester in which the project is to be completed.

**Pre-Requisites:** 12.00 credits

**Restrictions:** Minimum cumulative average of 70%. Instructor consent required.

### 1.2 Course Description

- This course is for students enrolling in a research project for the first time. IBIO\*4510 is reserved for students who have already taken IBIO\*4500.
- The student will undertake an independent research project of a practical or theoretical nature that relates either to ecology, evolutionary biology, comparative animal physiology or a related theme in biology or the teaching of these areas. The research will be conducted under the supervision of a faculty member in the Department of Integrative Biology.
- The course offers students the opportunity to gain hands-on research experience as well as a better appreciation of ways of engaging in scientific scholarship. The oral sessions will help develop the student's ability to communicate the rationale and relevance of the project and to clearly explain

the approach taken. Written skills will be developed in the research proposal and final project report.

- Students should make arrangements with a faculty advisor and the course coordinator at least one semester in advance. The project advisor must be a faculty member in the Department of Integrative Biology. The second reader must also be a faculty member at the University of Guelph, but may be from another department. Faculty who will be on leave during the semester may not serve as advisors or second readers.

### 1.3 Timetable

Fridays from 2:30 PM - 5:20 PM in SCIE 2315. Please note that the class does not meet every week. See teaching and learning activities for more information.

### 1.4 Final Exam

There is no final exam in this course.

---

## 2 Instructional Support

### 2.1 Instructional Support Team

<b>Course Co-ordinator:</b>	Dr. Moira Ferguson
<b>Email:</b>	mmfergus@uoguelph.ca
<b>Telephone:</b>	+1-519-824-4120 x52726
<b>Office:</b>	SC1 1457
<b>Office Hours:</b>	By appointment

---

## 3 Learning Resources

There is no required textbook for this course.

### 3.1 Required Resources

#### Courselink (Website)

<https://courselink.uoguelph.ca>

Materials relevant to the course including grading rubrics will be posted on the CourseLink site. In addition, research proposals and Powerpoint files for oral presentations will be submitted via the CourseLink dropbox. The final research paper will be submitted to dropbox and also by email to the course coordinator, advisor and second reader. Details will be provided as the deadlines approach.

### 3.2 Recommended Resources

**The Scientific Endeavor (Textbook)**

Lee, J.A. 2000. The Scientific Endeavor. A Primer on Scientific Principles and Practice. Addison Wesley Longman Inc, San Francisco.

---

## 4 Learning Outcomes

### 4.1 Course Learning Outcomes

By the end of this course, you should be able to:

1. Design a self-guided research question and project at the level expected for a fourth-year independent research project within the constraints imposed by the course (one semester, available resources etc.).
  2. Apply the scientific method to current problems in comparative animal physiology, ecology and evolutionary biology.
  3. Evaluate scientific evidence and demonstrate the use of logic, in the evaluation of the literature, including information on multiple perspectives, and statistical techniques used to analyze data
  4. Construct and efficiently conduct an experimental design by actively employing sampling techniques (empirical or theoretical) necessary to obtain unbiased and sufficient data
  5. Produce a research proposal, research article and oral presentation that convincingly communicates your research to an audience with a general biology background
- 

## 5 Teaching and Learning Activities

There are no traditional lectures or labs for this course. Because it is a 1.0 credit course, students should expect to invest 20 hours per week in their research project.

### 5.1 Lecture

**Fri, Jan 10, 2:30 PM - 5:20 PM**

**Topics:** First Class Meeting

- Introduction to course

**Fri, Jan 17, 2:30 PM - 5:20 PM**

**Topics:** Second Class Meeting

- Oral Presentation of research proposal
- Submission of project approval form + Safety + Animal Care forms
- Submission of one-page research summary

**Fri, Feb 28, 2:30 PM - 5:20 PM****Topics:** Mid-Semester Class Meeting

- Oral presentation of progress report
- Slides to be submitted to dropbox by 11 a.m. on February 28th

**Fri, Mar 27, 2:30 PM - 5:20 PM****Topics:** Final Class Meeting(s)

- Final oral presentation in regular time slot and additional slot that evening (TBD)
- Slides to be submitted to dropbox by 11 a.m. on March 27th

**5.2 Important Dates**

- Friday Jan. 10th: First class: Introduction. 2:30 p.m. – 5:20 p.m. in SCIE 2315
- Friday Jan. 17th: Second Class: Proposal presentation and submission of Project Approval Form in class, 2:30 p.m. – 5:20 p.m., SCIE 2315. One-page research summary (to dropbox by 11:00 p.m.)  
Students who fail to give an oral proposal presentation will be penalized 25% of the total marks for Research Effort unless Academic Consideration for illness or other compassionate grounds has been approved by the course coordinator
- Friday Jan. 24th: Research objectives outline due: A self-evaluation of progress on the project. This report will be considered as part of the Research Effort grade (20% of final grade). This is to be in the form of an EXCEL spreadsheet

setting out weekly goals for the project and is to be submitted to dropbox by 11:00 p.m. (see Courselink for further information on completion dates for advisor).

- Friday January 31st: Research proposal to be submitted to dropbox by 11:00 p.m. Completed forms for safety/ field work/ animal care to be provided to Dr. Ferguson by 5:00 p.m. SCIE 1457.
- Friday February 28th. Third class: Oral progress report. 2:30 p.m. – 5:20 p.m., SCIE 2315
- Friday March 27th. Fourth (final) class: Final oral presentation. 2:30 p.m. – 5:20 p.m and 6:30 p.m. – 9:30 p.m. (as needed) in SCIE 2315. Students are expected to attend all presentations in their session! A 5% penalty off the total course grade will be applied for non attendance.
- Friday April 3rd. Final written research report to be submitted to dropbox by 11:00 p.m. Email copies to advisor and second reader and copy Dr. Ferguson.
- Monday April 13th. Grades on final report and research effort due from Advisor and Second Reader to Course Coordinator by 5 p.m.

## 6 Assessments

### 6.1 Marking Schemes & Distributions

Name	Scheme A (%)
Written Research Proposal	15
Oral Progress Report	10
Final Oral Presentation	15
Written Final Research Report	40
Research Effort	20
Total	100

### 6.2 Assessment Details

#### Written Research Proposal (15%)

**Due:** Fri, Jan 31, 11:00 PM, Submit to dropbox

**Learning Outcome:** 1, 2, 3, 4, 5

Evaluated by Course Coordinator

#### Oral Progress Report (10%)

**Due:** Slides due: Feb. 28th by 11:00 AM in dropbox & Talks: Feb. 28th SCIE 2315 2:30-5:20 PM

**Learning Outcome:** 1, 2, 3, 4, 5  
Evaluated by Course Coordinator

#### **Final Oral Presentation (15%)**

**Date:** Slides due: March 27th by 11:00 a.m. in dropbox & Talks: March 27th, SCIE 2315 2:30-5:20 PM & 7-10 PM

**Learning Outcome:** 1, 2, 3, 4, 5  
Evaluated by Course Coordinator

#### **Written Final Research Report (40%)**

**Due:** Fri, Apr 3, 11:00 PM, Email to course coordinator, advisor and second reader

**Learning Outcome:** 1, 2, 3, 4, 5

- Evaluated by Advisor and Second Reader
- The final research paper for students enrolled in IBIO\*4500/4510 will be considered for a Bryant Family Research Scholarship.
- The grade for the final written report will be an average of the grades submitted by the advisor and the second reader. The report is to be submitted in the form of a publication-ready manuscript. The specific journal and style is to be agreed upon by the student and advisor at the beginning of the semester and recorded on the Project Approval form.

#### **Research Effort (20%)**

**Date:** Grades due to course coordinator: April 13th by 5 PM

**Learning Outcome:** 1, 2, 3, 4

- Evaluated by Advisor
- The requirements and the breakdown for this portion of the mark are to be agreed upon by the student and advisor, and recorded on the Project Approval form.

## **7 Course Statements**

### **7.1 Responsibilities of the Students**

It is the responsibility of the student to:

- Find a research advisor and second reader. Prospective students are encouraged to gauge their areas of research interest, survey the departmental

web site highlighting the research interests of faculty, and approach faculty possessing similar interests. A second reader for the final project report can be selected in consultation with the advisor but must be a faculty member at the University of Guelph.

- Familiarize themselves and their advisor with the procedures and the roles and responsibilities of the course. The student should consult with their advisor and the course coordinator on all aspects of the course, including the guidelines and requirements for the research proposal, the oral progress report, and the written final report. Each student is strongly encouraged to meet with their advisor before or at the beginning of the course to review the procedures and the roles and responsibilities, and to discuss expectations in light of the evaluation components of the course. If conflicts arise between the student and the advisor, the student has the responsibility and right to ask the course coordinator to intervene.
- Keep their advisor and the course coordinator informed of their progress during the semester. The student is expected to (i) monitor their day-to-day research progress, (ii) keep their advisor and the course coordinator aware of any concerns that are important to the success of the proposed research, and (iii) rely on their advisor for guidance on how to troubleshoot any challenges that may arise during the research.

## **7.2 Responsibilities of the Faculty Advisor**

It is the responsibility of the advisor to:

- Ensure the student is clear about what is expected from them on a week-to-week basis over the duration of the project, and ensure that their expectations are consistent with the contents of the course description. To be eligible to take on a project student, advisors cannot be away from campus for an extended period of time (e.g. on research/study or parental leave). A minimum of 30 minutes of face to face contact time per week, on average, is recommended. It is the advisor's role to offer advice and support to the student as challenges arise with the project, and to communicate and reinforce their expectations regarding the conduct of the student in the lab or field. As appropriate to the discipline and research project, the advisor will provide protocols used to track research progress, set up experiments, and collect, enter, validate, and analyze data.

- Ensure the student is supported adequately and appropriately to complete their research successfully. Depending on the project, this preparation could include (i) providing specialized training (e.g. electrofishing), (ii) ensuring access to key rooms, equipment, literature, or data, and (iii) overseeing the acquisition of approval from the Animal Care or Research Ethics Committees.
- Ensure the student is working safely in the lab or field. Project students are required to take the three CBS safety training modules. In addition, advisors are required to review the Safety Orientation Checklist with the student. Students working in the field must also submit the Field Research Safety Plan and the Field Trip Waiver and Contact List forms.
- Ensure the student appropriately balances their time between planning, data collection, and write-up. Laboratory work and data collection should cease by mid-November to provide students adequate time to analyze their data, write an initial draft, solicit feedback from the advisor, and revise the final report prior to submission.

### **7.3 Responsibilities of the Course Coordinator**

It is the responsibility of the course coordinator to:

- Ensure students are familiar with the organization of the course. This includes organizing initial classes to review the course's organization, evaluation requirements and methods of assessment, key forms, and the schedule of important dates. It will also include scheduling of the mini-symposium of class presentations.
- Ensure students have a secondary source of advice and guidance. This can include advising the class on how to communicate effectively with their advisors, or providing individual counseling in the event of problems that cannot be solved between a student and their advisor.
- Ensure students are assessed with similar rigor across advisors. The course coordinator will act as a contact for the advisors regarding course requirements and evaluation.

### **7.4 Lab & Field Safety**

- It is the student's responsibility to ensure that they participate in safety training and obtain safety instruction as required by the faculty advisor and as

appropriate to the techniques and equipment to which they will be exposed (e.g., radiation safety, biosafety, first aid/CPR, autoclaves, centrifuges, electrophoresis, etc). Students conducting work in the laboratory or field must demonstrate that they have completed the online modules for CBS Health and Safety Training. Students will be contacted by email early in the semester and instructions on what to do will be provided at that time. Please note that the 3 online modules must be completed within 1 week of receiving the email message. This is a requirement of the course.

- Advisors are required to provide a work-place specific Safety Orientation with project students and record it on the appropriate form. In addition, students whose research will be conducted under field conditions must, with the assistance of the faculty advisor who will sign it, fill out the Field Research Safety Plan and the Field Trip Waiver and Contact List. Forms are due to the course coordinator at the second class meeting.
- Students whose research involves live, non-human vertebrates must comply with the Animals for Research Act of Ontario and University Animal Care Policies. Before proceeding with such research, permission must be obtained from the University Animal Care Committee by completing and returning the Animal Utilization Protocol form available from the Department of Integrative Biology office. Students whose research involves human subjects must consult the Research Ethics website at <http://www.uoguelph.ca/research/humanParticipants/index.shtml> and fill out an application form available at <http://www.uoguelph.ca/research/forms/index.shtml>.

## 7.5 Missed Course Requirements & Grading

- Students who are unable to meet a course deadline for a graded component because of illness or compassionate reasons must request Academic Consideration as soon as possible by advising the course coordinator in writing, with their name, id#, and email contact. If approved, alternate deadlines will be arranged.
- Deadlines for submission of written assignments that are evaluated by the advisor and second reader CANNOT be altered by the advisor. Written assignments that are submitted after the deadlines will not be accepted unless Academic Consideration for illness or other compassionate grounds has been

approved by the course coordinator.

- Failure to submit slides by the deadline for the progress and final oral presentation will result in a 20% penalty off the value of the assessment.
- Students who fail to give an oral presentation during week 2 of the semester will be penalized 25% of the total marks for Research Effort unless Academic Consideration for illness or other compassionate grounds has been approved by the course coordinator.
- See the undergraduate calendar for further information on regulations and procedures for Academic Consideration:  
<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

## 8 Department of Integrative Biology Statements

### 8.1 Academic Advisors

If you are concerned about any aspect of your academic program:

- Make an appointment with a program counsellor in your degree program. [B.Sc. Academic Advising](#) or [Program Counsellors](#)

### 8.2 Academic Support

If you are struggling to succeed academically:

- Learning Commons: There are numerous academic resources offered by the Learning Commons including, Supported Learning Groups for a variety of courses, workshops related to time management, taking multiple choice exams, and general study skills. You can also set up individualized appointments with a learning specialist. <http://www.learningcommons.uoguelph.ca/>
- Science Commons: Located in the library, the Science Commons provides support for physics, mathematic/statistics, and chemistry. Details on their hours of operations can be found at: <http://www.lib.uoguelph.ca/get-assistance/studying/chemistry-physics-help> and <http://www.lib.uoguelph.ca/get-assistance/studying/math-stats-help>

### 8.3 Wellness

If you are struggling with personal or health issues:

- Counselling services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance. <https://www.uoguelph.ca/counselling/>
- Student Health Services is located on campus and is available to provide medical attention. <https://www.uoguelph.ca/studenthealthservices/clinic>
- For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations. <http://www.selfregulationskills.ca/>

## 9 University Statements

### 9.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

### 9.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Graduate Calendar - Grounds for Academic Consideration

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

Associate Diploma Calendar - Academic Consideration, Appeals and Petitions

<https://www.uoguelph.ca/registrar/calendars/diploma/current/index.shtml>

### 9.3 Drop Date

Students will have until the last day of classes to drop courses without academic penalty. The deadline to drop two-semester courses will be the last day of classes in the second semester. This applies to all students (undergraduate, graduate and diploma) except for Doctor of Veterinary Medicine and Associate Diploma in Veterinary Technology (conventional and alternative delivery) students. The regulations and procedures for course registration are available in their respective Academic Calendars.

Undergraduate Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Graduate Calendar - Registration Changes

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-reg-regchg.shtml>

Associate Diploma Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/diploma/current/c08/c08-drop.shtml>

## 9.4 Copies of Out-of-class Assignments

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

## 9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to book their exams at least 7 days in advance and not later than the 40th Class Day.

For Guelph students, information can be found on the SAS website

<https://www.uoguelph.ca/sas>

For Ridgetown students, information can be found on the Ridgetown SAS website

<https://www.ridgetownc.com/services/accessibilityservices.cfm>

## 9.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community-faculty, staff, and students-to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before

submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

Graduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

## 9.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

## 9.8 Resources

The Academic Calendars are the source of information about the University of Guelph's procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.

Academic Calendars

<https://www.uoguelph.ca/academics/calendars>
