

IBIO*4521 Thesis in Integrative Biology

Fall 2022

Section(s): 01

Department of Integrative Biology

Credit Weight: 1.00

Version 1.00 - September 07, 2022

1 Course Details

1.1 Calendar Description

This course is the first part of the two-semester course IBIO*4521/2. This course is a two-semester (F,W) undergraduate project in which students conduct a comprehensive, independent research project in organismal biology under the supervision of a faculty member in the Department of Integrative Biology. Projects involve a thorough literature review, a research proposal, original research communicated in oral and poster presentations, and in a written, publication quality document. This two-semester course offers students the opportunity to pursue research questions and experimental designs that cannot be completed in the single semester research courses. Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. A departmental registration form must be obtained from the course coordinator and submitted no later than the second class day of the fall semester. This is a two-semester course offered over consecutive semesters F-W. When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.

Pre-Requisites: 12.00 credits

Restrictions: Normally a minimum cumulative average of 70%. Permission of course coordinator.

1.2 Course Description

Please note the proposed course format, schedule or location for the Fall 2022 semester may change up to the first day of classes due to personnel, resource, and public health circumstances and if conditions cannot be met to ensure the safety of our students and instructors. Continue to watch the Student Planning website as format information could be updated until the first day of classes.

To register, students must complete and submit to the course coordinator:

- 1) the "Approval to Register" form, including the project advisor's signature;
- 2) a Course Registration Waiver form, including the credit overload section, if appropriate, to be signed by the course coordinator; and,
- 3) an unofficial copy of their transcripts.

For the F22/W23 academic year, the approval to register and course registration waiver forms can be downloaded from: <https://bit.ly/3bCuiag>

- IBIO*4521/4522 comprise a two semester (F,W) undergraduate thesis project in which students conduct comprehensive, independent research in organismal biology under the supervision of a faculty member in the Department of Integrative Biology. This two semester course offers students the opportunity to pursue research questions and experimental designs that cannot be completed in the single semester research courses (IBIO*4500/4510). **Due to the credit weighting of IBIO*4521/4522, students should expect to invest 20 hours per week over the two semesters of their research project.**
- Projects must be planned in advance and will involve the development and execution of a research proposal, plus communication of the research findings in poster and oral presentations, and in a written paper organized and formatted to the standards of leading journals in a field of study. The research can be practical or theoretical in nature.
- Restrictions: Enrollment is open to students in semesters 7 and 8 who have successfully completed a minimum of twelve (12) science credits. A minimum cumulative average of 70% overall is required for approval to register.
- Students must make arrangements with both a faculty supervisor and the course coordinator at least one semester in advance. The completed registration material must be submitted to the course coordinator no later than the second week of the term.
- When you select this course, you must select IBIO*4521 in the Fall semester and IBIO*4522 in the Winter semester. A grade will not be assigned to IBIO*4521 until IBIO*4522 has been completed.
- **The project advisor must be a faculty member in the Department of Integrative Biology.** The second reader may be a faculty member from Integrative Biology or from another department at the University of Guelph, or a sessional lecturer, postdoctoral fellow, or staff member from Integrative Biology. Faculty who will be on leave during either semester may not serve as advisors or second readers.

1.3 Timetable

There will be several meetings throughout the term; in particular, at the end of the term there will be a poster session to present progress on your thesis.

1.4 Final Exam

There is no final exam.

2 Instructional Support

2.1 Instructional Support Team

Course Co-ordinator:	Rob McLaughlin
Email:	rlmclaug@uoguelph.ca
Telephone:	+1-519-824-4120 x53620
Office:	SSC 2456

3 Learning Resources

There is no required textbook for this course.

3.1 Required Resources

Courselink (Website)

<https://courselink.uoguelph.ca/>

Materials relevant to the course including grading rubrics will be posted on the IBIO*4521/4522 Courselink site. In addition, the research proposal, self assessments, final research paper and files for oral presentations will be submitted via Courselink Dropboxes. Details will be provided as the deadlines approach.

4 Learning Outcomes

4.1 Course Learning Outcomes

By the end of this course, you should be able to:

1. Design a self-guided research question and project at the level expected for a fourth-year independent research thesis within the constraints imposed by the course (two semesters, 2 credits, available resources, etc.).
2. Apply the scientific method to current problems in comparative animal physiology, ecology and evolutionary biology.
3. Evaluate scientific evidence and demonstrate the use of logic in the evaluation of the

literature, including information on multiple perspectives, and statistical techniques used to analyse data.

4. Construct and efficiently conduct an appropriate study design by actively employing sampling and modeling techniques (empirical or theoretical) necessary to obtain unbiased and sufficient data.
 5. Create a research proposal, annotated bibliography, poster and oral presentations, and final project manuscript that convincingly communicate the proposed research and research findings to experts and to an audience with a general biology background.
 6. Create individual course learning goals relevant to the student's longer-term academic and career interests and reflect on and communicate the achievement of these goals over the course.
-

5 Teaching and Learning Activities

5.1 Seminar

Thu, Sep 8, 7:30 PM - 8:50 PM

Topics: First Class - Introduction and planning

- Location: SSC 3317

By Friday, 30 September

Topics: Oral Presentation 1

- Location: Your Lab Group

By Friday Oct 7

Topics: Effort Check

- A formal discussion with your Supervisor about your effort to date and how your effort will be graded over the term. No grade is assigned at this point.

Thu, Oct 27, 7:30 PM - 8:50 PM

Topics: Preparation for the Poster Session

- Location: SSC 3317

Thu, Nov 24, 2:30 PM - 4:30 PM

Topics: Poster Session and Q&A

- Location: SSC Atrium*
- *Time and location are subject to change based on availability and University Public Health guidelines

6 Assessments

6.1 Marking Schemes & Distributions

A student receives a single grade for both IBIO*4521 and IBIO*4522. This final grade will weigh the grades from the Fall term and Winter term equally.

6.2 Assessment Details

Self-Assessment 1 (5%)

Date: Fri, Sep 23, 11:59 PM, Submit to CourseLink Dropbox

- A 2 page reflective essay outlining your career goals, specific goals for this course, anticipated challenges, and steps you are taking, or will take, to meet these challenges.
- Evaluated by Course Coordinator

Oral Presentation 1 (5%)

Date: By 30 September 2022, Your thesis supervisor's lab group

- A presentation to your lab describing the background and rationale for your thesis, hypotheses and predictions to be tested, the methods you plan to use, and the expected time-line for completion of the key elements of your thesis.
- Evaluated by Supervisor

Thesis Proposal w/ Annotated Bibliography (35%)**Date:** Sun, Oct 23, 11:59 PM, Submit to Courselink Dropbox

- The proposal is a formal document providing the background and rationale for the thesis, a statement of the research questions or hypotheses and predictions to be tested, proposed methods, anticipated or preliminary results, and a statement of significance or contribution to the field of inquiry. The proposal should also include a timeline of milestones that indicates anticipated time periods when major aspects of the proposal (e.g., data collection, analysis, writing) of the proposal will be carried out.
- An annotated bibliography is a list key references relevant to the thesis presented in a professional and consistent style with each citation accompanied by a concise personal summary of what the author(s) asked, found, the implications of those findings for the field, and their relevance to the thesis project. The bibliography should demonstrate a well-studied characterization of the literature that goes beyond the articles cited in the proposal and demonstrates exploration of key elements of the thesis project (background on the research problem and hypotheses, study design, study organism and cites, and technical and analytical/statistical approaches, as appropriate).
- Evaluated by Supervisor and 2nd Reader

Scientific Poster and Session (30%)**Date:** Thu, Nov 24, SSC Atrium

- A scientific poster suitable for presentation at a scientific conference that communicates your thesis proposal and preliminary results (if applicable). The poster is expected to help you refine your project objectives and plans, hone your communication skills, and acquire feedback from colleagues.
- Evaluated by Supervisor, 2nd Reader and additional member of the IB Department

Self-Assessment 2 (5%)**Date:** Wed, Dec 14, 11:59 PM, Submit to Courselink Dropbox

- A 2 page reflective essay providing a self-assessment of your learning experience thus far, including assessment of your progress toward your course goals, your management of anticipated and unanticipated challenges, any

- aspects of your project that may be causing stress, and refinements needed in your course goals or work habits for the second half of the course.
- Evaluated by Course Coordinator

Effort (20%)

Date: Grade due to course coordinator: Wednesday, Dec 14

- An assessment of a student's effort in research and scholarship applied towards their thesis. Specific assessment criteria to be outlined by the supervisor at the beginning of the fall term.
- Evaluated by Supervisor

7 Course Statements

7.1 Individual Responsibilities

It is the responsibility of the student to:

- find a thesis supervisor and a second reader. Students are encouraged to gauge their areas of research interest, survey the departmental web site highlighting the research interests of faculty, and approach faculty possessing similar interests. A committee member can be selected in consultation with the supervisor, but must meet the course criteria for second readers (see above).
- familiarize themselves and their advisor with the procedures and the roles and responsibilities of the course. The student should consult with their advisor and the course coordinator on all aspects of the course, including the guidelines and dates for the course assessments. Each student is strongly encouraged to meet with their advisor before or at the beginning of each term to review the procedures and the roles and responsibilities. Each student is required to meet with their advisor to self-assess their progress and review effort at designated times during the course. If conflicts arise between the student and the advisor, the student has the responsibility and right to ask the course coordinator to intervene.
- keep their committee and the course coordinator informed of their progress during the semester. The student is expected to (i) monitor their day-to-day research progress, (ii) keep their committee and the course coordinator aware of any concerns that are important to the success of the proposed research, and (iii) rely on their committee for guidance on how to troubleshoot any challenges that may arise during the research.
- Conduct their field and/or laboratory research in a safe manner consistent with lab and university safety policies described in greater detail below (see Field and Lab Safety)

It is the responsibility of the advisor to:

- ensure the student is clear about what is expected from them on a week-to-week basis over the duration of the project, and ensure that their expectations are consistent with the contents of the course syllabus. To be eligible to take on a project student, advisors cannot be away from campus for an extended period of time (e.g. on research/study or parental leave). A minimum of 30 minutes of face to face contact time per week, on average, is recommended. It is the advisor's role to offer advice and support to the student as challenges arise with the project, and to communicate and reinforce their expectations regarding the conduct of the student in the lab or field. As appropriate to the discipline and research project, the advisor will provide feedback on the student's effort and progress and provide protocols to set up experiments and collect, enter, validate, and analyze data.

- ensure the student is supported adequately and appropriately to complete their research successfully. Depending on the project, this preparation could include (i) providing specialized training (e.g. electrofishing), (ii) ensuring access to key rooms, equipment, literature, or data, and (iii) overseeing that the student is working safely in the lab or field. Project students are required to take the three CBS safety training modules. Advisors are required to review the Safety Orientation Checklist with the student. Students working in the field must also submit the Field Research Safety Plan and the Field Trip Waiver and Contact List forms.

- ensure the student appropriately balances their time between planning, data collection, and write-up. Laboratory work and data collection should cease by mid-March to provide students adequate time to analyze their data, write an initial draft, solicit feedback from the thesis committee, and revise the thesis prior to submission.

It is the responsibility of the second reader to:

- meet as needed with the student to offer feedback, advice, encouragement, and criticism as appropriate. This includes meetings requested by the student, within reason, and the poster paper (semester 1) and final oral (semester 2) presentations.

It is the responsibility of the course coordinator to:

- notify advisors and second readers of the dates of poster presentations (semester 1) and final oral presentations (semester 2) at the beginning of the semester.

- ensure students are familiar with the organization of the course. This includes organizing initial classes to review the course's organization, evaluation requirements and methods of assessment, key forms, and the schedule of important dates. It will also include scheduling of class presentations.

- ensure students have a secondary source of advice and guidance. This can include advising the class on how to communicate effectively with their committees, or providing individual counselling in the event of problems that cannot be solved between a student and their advisor.

- act as a contact for the advisors regarding course requirements and evaluation, to ensure students are assessed with similar rigour across supervisors.

7.2 Field and Lab Safety

It is the student's responsibility to ensure that they participate in safety training and obtain safety instruction as required by the faculty advisor and as appropriate to the techniques and equipment to which they will be exposed (e.g., radiation safety, biosafety, first aid/CPR, autoclaves, centrifuges, electrophoresis, etc). Students conducting work in the laboratory or field must demonstrate that they have completed the online modules for CBS Health and Safety Training. This is a requirement of the course.

Advisors are required to provide a work-place specific Safety Orientation with project students and record it on the appropriate form. In addition, students whose research will be conducted under field conditions must, with the assistance of the faculty advisor who will sign it, fill out the Field Research Safety Plan and the Field Trip Waiver and Contact List. Forms are due to the course coordinator prior to the start of research.

Students whose research involves live, non-human vertebrates must comply with the Animals for Research Act of Ontario and University Animal Care Policies. Before proceeding with such research, permission must be obtained from the University Animal Care Committee by completing and returning the Animal Utilization Protocol form available from the Department of Integrative Biology office. Students whose research involves human subjects must consult the Research Ethics website at:

<http://www.uoguelph.ca/research/humanParticipants/index.shtml> and fill out an application form available at <http://www.uoguelph.ca/research/forms/index.shtml>.

7.3 Missed Course Requirements and Grading

Students who are unable to meet a course deadline for a graded component because of illness or compassionate reasons must request Academic Consideration as soon as possible by advising the course coordinator in writing, with their name, id#, and email contact. If approved, alternate deadlines will be arranged.

Deadlines for submission of written assignments cannot be altered by the advisor and the second reader. Written assignments that are submitted after the deadlines indicated in the Methods of Assessment table will not be accepted unless Academic Consideration for illness or other compassionate grounds has been approved by the course coordinator.

See the undergraduate calendar for further information on regulations and procedures for Academic Consideration:

<http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

8 Department of Integrative Biology Statements

8.1 Academic Advisors

If you are concerned about any aspect of your academic program:

- Make an appointment with a program counsellor in your degree program. [B.Sc. Academic Advising](#) or [Program Counsellors](#)

8.2 Academic Support

If you are struggling to succeed academically:

- Learning Commons: There are numerous academic resources offered by the Learning Commons including, Supported Learning Groups for a variety of courses, workshops related to time management, taking multiple choice exams, and general study skills. You can also set up individualized appointments with a learning specialist. <http://www.learningcommons.uoguelph.ca/>
- Science Commons: Located in the library, the Science Commons provides support for physics, mathematic/statistics, and chemistry. Details on their hours of operations can be found at: <http://www.lib.uoguelph.ca/get-assistance/studying/chemistry-physics-help> and <http://www.lib.uoguelph.ca/get-assistance/studying/math-stats-help>

8.3 Wellness

If you are struggling with personal or health issues:

- Counselling services offers individualized appointments to help students work through personal struggles that may be impacting their academic performance. <https://www.uoguelph.ca/counselling/>
- Student Health Services is located on campus and is available to provide medical attention. <https://www.uoguelph.ca/studenthealthservices/clinic>
- For support related to stress and anxiety, besides Health Services and Counselling Services, Kathy Somers runs training workshops and one-on-one sessions related to stress management and high performance situations. <http://www.selfregulationskills.ca/>

8.4 Personal information

Personal information is collected under the authority of the University of Guelph Act (1964), and in accordance with Ontario's Freedom of Information and Protection of Privacy Act (FIPPA) <http://www.e-laws.gov.on.ca/index.html>. This information is used by University

officials in order to carry out their authorized academic and administrative responsibilities and also to establish a relationship for alumni and development purposes.

For more information regarding the Collection, Use and Disclosure of Personal Information policies please see the Undergraduate Calendar.

(<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/intro/index.shtml>)

8.5 Course Offering Information Disclaimer

Please note that course delivery format (face-to-face vs online) is subject to change up to the first-class day depending on requirements placed on the University and its employees by public health bodies, and local, provincial and federal governments. Any changes to course format prior to the first class will be posted on WebAdvisor/Student Planning as they become available.

9 University Statements

9.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

9.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml>

Graduate Calendar - Grounds for Academic Consideration

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

Associate Diploma Calendar - Academic Consideration, Appeals and Petitions

<https://www.uoguelph.ca/registrar/calendars/diploma/current/index.shtml>

9.3 Drop Date

Students will have until the last day of classes to drop courses without academic penalty. The deadline to drop two-semester courses will be the last day of classes in the second semester. This applies to all students (undergraduate, graduate and diploma) except for Doctor of Veterinary Medicine and Associate Diploma in Veterinary Technology (conventional and alternative delivery) students. The regulations and procedures for course registration are available in their respective Academic Calendars.

Undergraduate Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml>

Graduate Calendar - Registration Changes

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-reg-regchg.shtml>

Associate Diploma Calendar - Dropping Courses

<https://www.uoguelph.ca/registrar/calendars/diploma/current/c08/c08-drop.shtml>

9.4 Copies of Out-of-class Assignments

Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

9.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to make a booking at least 14 days in advance, and no later than November 1 (fall), March 1 (winter) or July 1 (summer). Similarly, new or changed accommodations for online quizzes, tests and exams must be approved at least a week ahead of time.

For Guelph students, information can be found on the SAS website

<https://www.uoguelph.ca/sas>

For Ridgetown students, information can be found on the Ridgetown SAS website

<https://www.ridgetownc.com/services/accessibilityservices.cfm>

9.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community—faculty, staff, and students—to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not

relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml>

Graduate Calendar - Academic Misconduct

<https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml>

9.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

9.8 Resources

The Academic Calendars are the source of information about the University of Guelph's procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.

Academic Calendars

<https://www.uoguelph.ca/academics/calendars>

9.9 Disclaimer

Please note that the ongoing COVID-19 pandemic may necessitate a revision of the format of course offerings, changes in classroom protocols, and academic schedules. Any such changes will be announced via CourseLink and/or class email.

This includes on-campus scheduling during the semester, mid-terms and final examination schedules. All University-wide decisions will be posted on the COVID-19 website (<https://news.uoguelph.ca/2019-novel-coronavirus-information/>) and circulated by email.

9.10 Illness

Medical notes will not normally be required for singular instances of academic consideration, although students may be required to provide supporting documentation for multiple missed assessments or when involving a large part of a course (e.g.. final exam or major assignment).

9.11 Covid-19 Safety Protocols

For information on current safety protocols, follow these links:

- <https://news.uoguelph.ca/return-to-campus/how-u-of-g-is-preparing-for-your-safe-return/>
- <https://news.uoguelph.ca/return-to-campus/spaces/#ClassroomSpaces>

Please note, these guidelines may be updated as required in response to evolving University, Public Health or government directives.
