Host a Brazilian undergraduate

SCIENCE WITHOUT BORDERS

student this summer

Science without Borders (SwB) is a scholarship program jointly funded by the Brazilian government and private sector.

SwB students come to Guelph for 12-16 months, with a combination of English language studies (if needed), two academic semesters, and an unpaid research or industry placement in the summer.

The University of Guelph has been an exceptionally popular choice for students in Science, Technology and Engineering.

What’s in it for you?

• Gain new perspectives and diversify your team with some of Brazil’s top students.
• Work with enthusiastic and dedicated students who contribute unique knowledge and skills to your projects.
• Build connections with the next generation of global science and technology innovators.
• Tap into the growing Canada-Brazil relationship.

Who can host a student?

Any company, organization or institution that can provide:

• A 3-4 month, full-time, applied learning experience related to the student’s program of study, beginning in May.
• Regular supervision and mentorship.
• Appropriate working conditions, facilities, and training.
• A placement in Guelph or surrounding areas.
