Program Overview

Your Master of Arts in Leadership degree starts with an on-site residential experience where you complete a brief, intensive, in-class course. This cohort experience helps to develop strong connections with your peers that expand your business network and last a lifetime!

HERE'S A QUICK RUNDOWN:

After your first residential week you will begin your online courses. These courses involve real world case studies, simulations and cohort experiences – it's not all about the textbook. Our goal is to empower and enable you to apply what you learn directly to your career.

Following a second residential experience and an additional online core course, you will complete a major research project that investigates a leadership problem or issue and adds a professional, referenced report to your portfolio. Alternatively, you have the option to take two elective courses.

Admission Requirements

- A four-year undergraduate degree or its equivalent (from a recognized university or college) with a minimum average of B- (70-72%) in the last two years of study and a minimum of three years relevant work experience.
- Alternate admission may be offered to those with a three-year general degree, diploma and/or an acceptable professional designation with a minimum average of B- (70-72%) in the last two years of study, and at least five years of relevant work experience showing progressive increases in responsibility.

On-site Experiences & Online Learning

It can be difficult to find time in your busy schedule to complete a 100% on-campus program, while online-only programs don't allow for a fully transformational experience. Lang's Masters in Leadership program gives you the

flexibility to complete course content on your own schedule (via online learning) as well as benefit from the face-to-face interactions with your fellow peers and faculty during the on-site residential experiences.

On-Site Learning

The week-long on-site residential experiences provide a career-defining opportunity for you to learn from faculty who have significant industry experience and have developed game-changing research. Just as important, you will tackle your coursework with your peers who are in diverse and complementary industries.

This collaborative process is crucial to our learning approach as you will learn new strategies and skills relevant to your career and form personal bonds with your classmates and faculty.

Online Learning

We believe in asynchronous learning so you can work on the course material at your own pace while still fulfilling your career and personal obligations. You can expect to commit 20-25 hours each week during the online courses.

Learning Beyond the Classroom

During residential experiences, the physical classroom extends to unique environments that test your leadership strengths and capabilities. The bond you strike with your fellow classmates lasts a lifetime!

Team building opportunities often include:

- Rock climbing
- Painting the famous U of G cannon
- Meditation
- Scavenger hunts
- Enjoying Canada's #1 ranked campus food
